IMPORTANT INFORMATION REGARDING THE SELECTION OF YOUR MOTORHOME

When buying a motorhome, camper van or urban vehicle (hereafter: motorhome), it is particularly important to choose the right layout and an appealing design. In addition, weight also plays an essential role. Family, friends, optional equipment, accessories and baggage – space must be available for all of these. At the same time, there are legal and technical limits to the configuration and load. Every motorhome is designed for a certain weight, which may not be exceeded during driving. For motorhome buyers, this raises the question: How should I configure my vehicle to accommodate passengers, baggage and accessories according to my needs without the vehicle exceeding this maximum weight? In order to make this decision easier for you, we provide you below with a few tips that are particularly important when selecting your vehicle from our portfolio:

1. The technically permissible maximum laden mass…

… is a value set by the manufacturer which the vehicle may not exceed. HYMER specifies a layout-related upper limit for the vehicle, which can vary from layout to layout (e.g. 3,500 kg, 4,400 kg). You can find the corresponding specification for each layout in the technical data.

	ML-T 570	ML-T 580
Standard chassis	Mercedes-Benz Sprinter 415 CDI	Mercedes-Benz Sprinter 415 CDI
Drive	Rear Wheel Drive / All Wheel Drive ○	Rear Wheel Drive / All Wheel Drive ○
kW (hp)	110 (150)	110 (150)
Length / Width / Height (cm)	674 / 222 / 290 [1)]	698 / 222 / 290 [1)]
Body width / Internal width (cm)	212 / 205	212 / 205
Standing height in living area (cm)	198	198
Wheelbase (mm)	3665	3665
Mass in running order (kg)*	2960 (2812 - 3108)*	2980 (2831 - 3129)*
Manufacturer-specified mass for optional equipment (kg)*	182	160
Technically permissible maximum laden mass (kg)*	3500	3500
Technically permissible maximum towable mass (kg)*	2000 [2)]	2000 [2)]
Permitted number of seats (including driver)*	4 [3)]	4 [3)]

2. The mass in running order…

… consists – to put it simply – of the basic vehicle with standard equipment plus a standard weight of 75 kg for the driver. It is legally permissible and possible for the mass in running order of your vehicle to deviate from the nominal value stated in the sales documents. The permissible tolerance is ± 5 %. The permissible range in kilograms is given in brackets after the mass in running order. In order to provide you with full transparency regarding possible weight deviations, HYMER weighs each vehicle at the end of the line and informs your trade partner of your vehicle's weighing result for forwarding to you.
Detailed explanations on the subject of mass in running order can be found in the “Legal Information” section.

IMPORTANT INFORMATION REGARDING THE SELECTION OF YOUR MOTORHOME

3. The permitted number of seats (including driver)...

... is determined by the manufacturer in what is referred to as the type-approval procedure. This results in what is referred to as the mass of the passengers. For this, a standard weight of 75 kg per passenger (without driver) is calculated. Detailed explanations on the subject of mass of the passengers can be found in the “Legal Information” section

	ML-T 570	ML-T 580
Standard chassis	Mercedes-Benz Sprinter 415 CDI	Mercedes-Benz Sprinter 415 CDI
Drive	Rear Wheel Drive / All Wheel Drive O	Rear Wheel Drive / All Wheel Drive O
kW (hp)	110 (150)	110 (150)
Length / Width / Height (cm)	674 / 222 / 290 [1]	698 / 222 / 290 [1]
Body width / Internal width (cm)	212 / 205	212 / 205
Standing height in living area (cm)	198	198
Wheelbase (mm)	3665	3665

Technically permissible maximum towable mass (kg)*	2000 [2]	2000 [2]
Permitted number of seats (including driver)*	4 [3]	4 [3]

4. The manufacturer-specified mass for optional equipment...

... is a value set by HYMER per layout for the maximum mass of optional equipment that can be ordered. This limit is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by HYMER. If, in exceptional cases, the weighing at the end of the line nevertheless shows that the actual load capacity falls short of the minimum pay-mass due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle.
Detailed explanations on the subject of the effects of the tolerances on the minimum pay-mass and the payload can be found in the “Legal Information” section.

OPTIONAL EQUIPMENT HYMER ML-T

		Price € [a]	ML-T 570	ML-T 580	Excess weight (kg)*

5. The additional weight of optional equipment and packages...

... increases the actual mass of the vehicle (= mass in running order plus selected optional equipment) and reduces the pay-mass. The specified value shows the additional weight compared to the standard equipment of the respective layout. The total weight of the selected packages and optional equipment must not exceed the manufacturer-specified mass for optional equipment.

* INFO

The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that Hymer uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by Hymer. The real weight of your vehicle ex works can only be determined when it is weighed at the end of the line. If, in exceptional cases, the weighing shows that the actual load capacity falls below theminimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations in the footnotes section.

* INFO

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Hymer uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

PACKS HYMER EXSIS-T

Driving Comfort Package	
LED headlights incl. LED Daytime Running Light	
Automatic AirCon with pollen filter	
Shelf for smartphones incl. wireless charging with charge level indicator

* INFO

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Hymer uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, see the footnote explanations.

◆ On request (no extra cost) — Not possible □ Available in package

* INFO

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Hymer uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, see the footnote explanations.

* INFO

The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that Hymer uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by Hymer. The real weight of your vehicle ex works can only be determined when it is weighed at the end of the line. If, in exceptional cases, the weighing shows that the actual load capacity falls below theminimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations in the footnotes section.

PACKS HYMER GT-S

Chassis package	
LED High-Performance headlights	
Fully automatic climate control THERMOTRONIC	
Shelf for smartphones incl. wireless charging with charge level indicator	
Dashboard charging pack (2 USB-C connections with 5 V as well as one additional 12 V socket)	
SatNav & Smartpone integration for Mercedes-Benz MBUX	
High Beam Assist	
Fog lights with cornering light	
Bumper, attachment parts and grill frame painted in vehicle colour	
Chrome grill	
Package price (incl. VAT)	5,670.-
Excess weight (kg)*	5

Winter package	
Seat heating and lumbar support for Original Mercedes-Benz seats	
Warm air auxiliary heating, electric	
Wet Wiper System (windscreen wiper with integrated spray nozzles)	
Steering wheel heating	
Heat insulating cab	
Package price (incl. VAT)	1,500.-
Excess weight (kg)*	4

Living comfort package	
Ambient lighting	
Additional sockets: 4 x 230 V / 1 x 12 V / 1 x Twin-USB	
Fitted sheets made to measure for rear beds individually adapted to mattress	
Partitioning curtain in the rear	
2 cushions	
Package price (incl. VAT)	880.-
Excess weight (kg)*	6

Autonomy package XL	
Hymer Smart Battery System 2.0 - extension: 2nd 80 Ah LFP habitation battery module incl. additional charger (160 Ah overall capacity)	
Hymer Smart Battery System 2.0 - extension: 3rd 80 Ah LFP habitation battery module (240 Ah overall capacity)	
Hymer Smart Battery System 2.0 - extension: 4th 80 Ah LFP habitation battery module (320 Ah overall capacity)	
Inverter 12 V to 230 V, 1,800 W with network priority circuit	
Package price (incl. VAT)	5,760.-
Excess weight (kg)*	45.5

* INFO

The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that Hymer uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by Hymer. The real weight of your vehicle ex works can only be determined when it is weighed at the end of the line. If, in exceptional cases, the weighing shows that the actual load capacity falls below theminimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations in the footnotes section.

STANDARD EQUIPMENT HYMER ML-T

	ML-T 570	ML-T 580
Chassis / Weight variants		
Mercedes-Benz Sprinter 3.5 t - 417 CDI - 125 KW/170 hp - Euro VI-E	●	●
Basis		
Exterior cab colour: White	●	●
Exterior body colour: White	●	●
Mercedes-Benz Original ladder-type frame	●	●
6-speed manual transmission ECO Gear	●	●

22 l AdBlue tank	●	●
Electrically adjustable and heated exterior mirrors	●	●
Mud flaps, rear axle	●	●
Daytime Running Light integrated in headlights	●	●
Trailer hitch pre-installation	●	●
Reinforced front axle	●	●
Thermal insulation glass front and side cab windows	●	●
16" steel rims (silver) with wheel hub cover and All Season tyres [45)]	●	●
Shelf above windscreen	●	●
Mercedes-Benz acoustics package	●	●
ECO Start-Stop feature [46)]	●	●
Electric cab windows and central locking for cab	●	●
Electric parking brake	●	●
Driver and passenger airbag	●	●
Semi-automatic climate control TEMPMATIC	●	●
Keyless Start (start-stop button for comfortable engine start)	●	●
Hinged lid for central storage compartment on the dashboard	●	●
Mercedes-Benz instrument cluster with colour display	●	●
Steering wheel, height and tilt adjustable	●	●
Multifunctional steering wheel	●	●
Open shelf cockpit passenger side	●	●
Parameterisable special module for controlling retrofitted electronic add-on parts	●	●
ABS (Anti-lock Brake System) / ASR (Anti-Slip Control) / EBV (Electric Brake Force Distribution) and ESP (Electric Stability Program)	●	●
Active Brake Assist	●	●
Active Lane Keeping Assist	●	●
Attention Assist	●	●
Automatic headlight control	●	●
Hill Start Assist	●	●
Electric parking brake	●	●
Intelligent Speed Assistant	●	●
Rain sensor	●	●
Tyre pressure sensors [47)]	●	●
Crosswind Assist	●	●
Cruise Control incl. steering wheel multifunction buttons	●	●
DAB Radio	●	●
10.25" MBUX Multimedia system with reversing camera, Voice recognition and Touchscreen	●	●
Body		
Optimal PUAL Sandwich insulation alloy / alloy (34 mm wall and roof thickness)	●	●
60 cm Maxi Comfort habitation door incl. window with blackout blind and waste bin	●	●
Electric entrance step, 1-step	●	●
Exclusive Hymer Multifunctional rear lights in LED-Hybrid technology	●	●
Garage load up to 350 kg (optional 450 kg). Please note the axle load.	●	●
Large garage doors, LH and RH side	●	●
GRP lightweight floor with XPS insulation (41 mm floor thickness)	●	●
Panoramic skylight above cab with integrative panelling, manually hinged	●	●
Hymer panoramic skylight 80 x 50 cm, double-glazed with LED lighting, living room	●	●
Skylight (clear glass) above rear bed(s) with blackout blind and mosquito net, 40 x 40 cm	●	●
Outfitting		
Mercedes-Benz Comfort seat in living area fabric, height- and tilt adjustable, rotating, with 2 armrests and integral look	●	●
Front seating group with fixed table (extendable)	●	●
Integrative cladding of the habitation door	●	●
Overhead lockers with Soft-Open & Close feature	●	●
Comfort push locks with genuine leather loops on flaps and drawers	●	●

	ML-T 570	ML-T 580
Open shelf above cab	●	●
Wall panel with multifunctional rail system in the entrance area and the seating group for multiple use	●	●
Mosquito net on habitation door	●	●
Cab blinds	●	●
Flyscreen and blackout blinds on all windows (in the body construction)	●	●
Lashing rails in the garage for load securing	●	●
Living and bedroom + lighting		
Double seat bench with 2 integrated 3-point seat belt	●	●
Multi-zone cold foam mattress incl. high-quality mattress pad (knitted fabric) for ventilation in the rear	●	●
Multifunctional rail system on both sides in the sleeping area for versatile use	●	●
Open compartment in the sleeping area incl. rubber strap	●	●
Open shelf entrance element with stylish Coming Home lighting and additional storage space	●	●
Partitioning curtain between bed- and living room [48)]	●	●
Complete LED interior lighting incl. night light	●	●
LED gooseneck lights above cab incl. USB socket	●	●
LED awning light	●	●
Kitchen		
3-burner gas cooker with ignition fuse, electric ignition, flame guard and glass cover	●	●
133 l compressor fridge incl. freezer compartment (17 l)	●	●
Extra wide kitchen drawers incl. cutlery tray and Servo Soft feature	●	●
Kitchen wall panelling	●	●
8 l waste bin in kitchen drawer (can also be flexibly hung on drawer)	●	●
Multifunctional rail for individual use in the kitchen	●	●
Black matt water tap on high-class wall with tile optics	●	●
Bathroom		
Variable bathroom with swivel wall, roller door and black matt fittings	●	–
Comfort bathroom with black matt fittings	–	●
Bench toilet with level indicator and cassette on wheels	●	●
Toothbrush cup incl. bracket	–	●
Installation & Technology		
6 kW Diesel warm air heating with 10 l warm water boiler as well as atmospheric pressure sensor (altitude kit)	●	●
Warm air heating in the rear bedroom, adjustable separately	●	●
Hymer Connect to control and monitor smart vehicle features via the Hymer Connect App. [49)]	●	●
7" touch display for convenient control and monitoring of smart vehicle features	●	●
Gas bottle compartment with access via the external flap / door	●	●
Hymer Smart Battery System 2.0: 80 Ah LFP Habitation battery module (overall capacity 80 Ah)	●	●
Charging booster for safe charging of the habitation battery while driving (up to 70 A)	●	●
120 l fresh water tank, insulated and heated (20 l in driving position)	●	●
100 l waste water tank, insulated and heated	●	●
Smart Connect water level display (in 1% increments)	●	●
Electric waste water drainage	●	●
Automatic gas bottle changeover system with crash sensor and IceEx	●	●
Multimedia		
Radio / TV pre-installation incl. 12 V socket, 2 speakers in the cab, 2 speakers in the semi-integrated bonnet, radio and DVB-T2 antenna	●	●
Fabrics & Furniture finishes		
Furniture finish: Native Bamboo	●	●
Fabric combination: Indiana	●	●

* INFO

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Hymer uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, see the footnote explanations.

* INFO

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Hymer uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, see the footnote explanations.

* INFO

The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that Hymer uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by Hymer. The real weight of your vehicle ex works can only be determined when it is weighed at the end of the line. If, in exceptional cases, the weighing shows that the actual load capacity falls below theminimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations in the footnotes section.

Excess weight (kg)*	10.5

* INFO

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Hymer uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

Arctic package	
Gas Warm water heating incl. garage floor heating	
Heat exchanger for gas warm water heating	
Heat exchanger pre-installation, Mercedes-Benz	
Comfort habitation door with window, blackout blind, integrated waste bin as well as 2-way lock	
Checker plate floor in the rear garage	
Insulated partitioning curtain for cab, double-layered sewn	
Insulating mat for cab footwell, supplied loose

* INFO

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Hymer uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, see the footnote explanations.

* INFO

The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that Hymer uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by Hymer. The real weight of your vehicle ex works can only be determined when it is weighed at the end of the line. If, in exceptional cases, the weighing shows that the actual load capacity falls below theminimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations in the footnotes section.

* INFO

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Hymer uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

* INFO

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Hymer uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, see the footnote explanations.

* INFO

The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that Hymer uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by Hymer. The real weight of your vehicle ex works can only be determined when it is weighed at the end of the line. If, in exceptional cases, the weighing shows that the actual load capacity falls below theminimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations in the footnotes section.

PACKS HYMER B-CLASS MASTERLINE T

Package	Chassis package Plus	Chassis package Premium
Leather steering wheel (automatic transmission only)	●	–
Active Distance Assist DISTRONIC+ incl. steering wheel multifunction buttons	●	–
Traffic Sign Assist	●	–
SatNav & Smartpone integration for Mercedes-Benz MBUX	●	–
LED High-Performance headlights	–	●
Shelf for smartphones incl. wireless charging with charge level indicator	–	●
Dashboard charging pack (2 USB-C connections with 5 V as well as one additional 12 V socket)	–	●
Fully automatic climate control THERMOTRONIC	–	●
Package price (incl. VAT) £	**3,110.-**	**2,620.-**
Excess weight (kg)*	**0**	**5**

Package	Autonomy package Smart	Autonomy package XL
Hymer Smart Battery System 2.0 - extension: 2nd 80 Ah LFP habitation battery module incl. additional charger (160 Ah overall capacity)	●	●
Hymer Smart Battery System 2.0 - extension: 3rd 80 Ah LFP habitation battery module (240 Ah overall capacity)	●	●
Inverter 12 V to 230 V, 1,300 W with network priority circuit	●	–
Hymer Smart Battery System 2.0 - extension: 4th 80 Ah LFP habitation battery module (320 Ah overall capacity)	–	●
Inverter 12 V to 230 V, 1,600 W with network priority circuit	–	●
Package price (incl. VAT) £	**4,250.-**	**5,760.-**
Excess weight (kg)*	**36.5**	**52**

Style package	
Chrome grill	
Bumper, attachment parts and grill frame painted in vehicle colour	
Fog lights with cornering light	
Package price (incl. VAT)	1,230.-
Excess weight (kg)*	0

Living Comfort package	
Shower duck board	
Additional sockets: 4 x 230 V / 1 x 12 V / 1 x Twin-USB as well as comfort lights	
Fitted sheets made to measure for rear beds individually adapted to mattress	
2 cushions	
Felt trim in the rear garage	
Package price (incl. VAT)	1,230.-
Excess weight (kg)*	9

* INFO

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Hymer uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

Arctic package	
Gas Warm water heating incl. garage floor heating	
Heat exchanger for gas warm water heating	
Heat exchanger pre-installation, Mercedes-Benz	
Insulating mat for cab footwell, supplied loose	
Insulated partitioning curtain for cab, double-layered sewn	
Checker plate floor and 2 additional lashing rails in the rear garage	
Auxiliary heater (helps to quickly warm up the engine and the cab)	
Package price (incl. VAT)	4,330.-
Excess weight (kg)*	71.5

Winter package	
Seat heating and lumbar support for Original Mercedes-Benz seats	
Wet Wiper System (windscreen wiper with integrated spray nozzles)	
Steering wheel heating	
Heat insulating cab	
Package price (incl. VAT)	1,230.-
Excess weight (kg)*	3

* INFO

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Hymer uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, see the footnote explanations.

* INFO

The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that Hymer uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by Hymer. The real weight of your vehicle ex works can only be determined when it is weighed at the end of the line. If, in exceptional cases, the weighing shows that the actual load capacity falls below theminimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations in the footnotes section.

STANDARD EQUIPMENT HYMER B-CLASS MASTERLINE I

PACKS HYMER B-CLASS MASTERLINE I

Package	Chassis package Plus	Chassis package Premium
Leather steering wheel (automatic transmission only)	●	–
Active Distance Assist DISTRONIC+ incl. steering wheel multifunction buttons	●	–
Traffic Sign Assist	●	–
SatNav & Smartpone integration for Mercedes-Benz MBUX	●	–
Shelf for smartphones incl. wireless charging with charge level indicator	–	●
Dashboard charging pack (2 USB-C connections with 5 V as well as one additional 12 V socket)	–	●
Fully automatic climate control THERMOTRONIC	–	●
Package price (incl. VAT) £	**3,110.-**	**980.-**
Excess weight (kg)*	**0**	**3**

Package	Autonomy package Smart	Autonomy package XL
Hymer Smart Battery System 2.0 - extension: 2nd 80 Ah LFP habitation battery module incl. additional charger (160 Ah overall capacity)	●	●
Hymer Smart Battery System 2.0 - extension: 3rd 80 Ah LFP habitation battery module (240 Ah overall capacity)	●	●
Inverter 12 V to 230 V, 1,300 W with network priority circuit	●	–
Hymer Smart Battery System 2.0 - extension: 4th 80 Ah LFP habitation battery module (320 Ah overall capacity)	–	●
Inverter 12 V to 230 V, 1,600 W with network priority circuit	–	●
Package price (incl. VAT) £	**4,250.-**	**5,760.-**
Excess weight (kg)*	**36.5**	**52**

Living Comfort package	
Shower duck board	
Additional sockets: 4 x 230 V / 1 x 12 V / 1 x Twin-USB as well as comfort lights	
Fitted sheets made to measure for rear beds individually adapted to mattress	
2 cushions	
Felt trim in the rear garage	
Package price (incl. VAT)	1,230.-
Excess weight (kg)*	9

Arctic package SMART	
Heat exchanger for gas warm water heating	
Heat exchanger pre-installation, Mercedes-Benz	
Gas-Warm water garage floor heating	
External insulation windscreen mat	
Insulating mat for cab footwell, supplied loose	
Auxiliary heater (helps to quickly warm up the engine and the cab)	
Checker plate floor and 2 additional lashing rails in the rear garage	
Package price (incl. VAT)	2,290.-
Excess weight (kg)*	17.5

* INFO

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Hymer uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, see the footnote explanations.

* INFO

The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that Hymer uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by Hymer. The real weight of your vehicle ex works can only be determined when it is weighed at the end of the line. If, in exceptional cases, the weighing shows that the actual load capacity falls below theminimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations in the footnotes section.

* INFO

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Hymer uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

OPTIONAL EQUIPMENT HYMER VENTURE S

		Price £ [a)]	Venture S	Excess weight (kg)*

● Standard equipment ○ Optional equipment ▲ Mandatory △ Not known at the time of publication Further information from p. 63
◆ On request (no extra cost) — Not possible □ Available in package

* INFO

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Hymer uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, see the footnote explanations.

HYMER ORIGINAL PARTS FOR YOUR MOTORHOME

The HYMER Original Parts product range offers you solutions with added value that combine an excellent fit with harmonious design – and, of course, in the renowned HYMER quality. Whether you're looking for a solution for securely transporting your bikes or are interested in being more self-sufficient, we offer you tailor-made products for your vehicle.

HYMER Bike Carrier: practical solution for transporting your bikes in the rear garage

With the HYMER Bike Carrier you can easily and efficiently store up to two bicycles or e-bikes in the rear garage. The individually adjustable vertical support pole and holding brackets make the loading process a breeze.

Make the space your own thanks to the range of modular accessories for the hook-on rail

HYMER Original Parts offers you accessories such as tablet holders, a universal shelf and spice racks for the integrated rail in the living area. Adapt the walls to perfectly suit your needs!

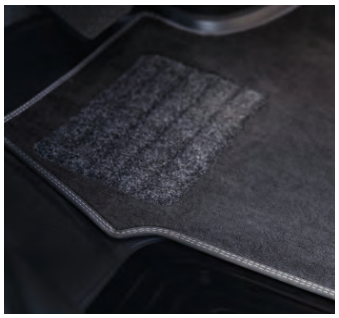

HYMER insulation and sunblinds

Protect yourself from the heat or cold inside the vehicle with insulation and sunblinds from HYMER Original Parts. The high-quality blinds can be installed in just a few simple steps and are extremely durable.

HYMER cab carpet

Protect the cab of your motorhome with the high-quality cab carpet from HYMER Original Parts. The carpet is made of made-to-measure and low-maintenance polypropylene tufted velour and finished off with an embroidered HYMER logo.

Tailor-made solutions for your sleeping comfort, various storage space solutions, a wide range of merchandise and items from our collections are also available from HYMER Original Parts – and much more besides. Take a look at the entire product range of HYMER Original Parts.

*NOTE

Original accessories are not available direct from the factory, but are instead ordered and retrofitted exclusively via your HYMER dealer. The items are retrofitted to the vehicle following delivery from the factory and are not the responsibility of the manufacturer. Original HYMER parts and accessories that are retrofitted to a vehicle affect the payload capacity and axle loads.

Please note that the technically permissible maximum laden mass on the axle must not be exceeded even after fitting the original HYMER parts and accessories. For further information and explanations on the topic of weight, please refer to our weight information.

IMPORTANT INFORMATION

Abbreviations
ABS - Anti-lock Braking System
ASR - Anti-Slip Control - Traction Control
EDS - Electronic Differential Lock
ESC - Driving Dynamics Control = ESP
ESP - Electronic Stability Control - Driving Dynamics Control
HBA - Hydraulic Brake Assist
LAC - Load Adaptive Control
MSR - Engine Drag Torque Control
EBV - Electronic Brake-Force Distribution

Any modification in the Original factory condition of your vehicle may result in impaired driving and / or driving safety.

Please note that the standard equipment may be omitted when ordering optional extras. Individual package contents can sometimes be ordered individually. Since not all dependencies of optional extras can be listed here, please check with your Hymer dealer.

Accessories and original spare parts recommended by Hymer GmbH & Co KG are designed, developed and approved specifically for your vehicle. Your Hymer dealer supplies these products; he is informed about all the technical details and can perform the necessary work in the correct manner. Accessories, add-on, conversion or installation parts not approved by Hymer GmbH & Co KG may cause damage to the vehicle and impair road safety. Even if an expert's report, a parts BE or a type approval is available for these parts, there is no presumption of the proper condition of the product. Please understand that for any damage caused by non-approved products or not permitted changes, Hymer GmbH & Co KG CANNOT be made liable.

Weight figures are approximate values. The payload stated in the price list is reduced by the weights stated in the price list if optional extras are fitted.

Please note: The alternative engine options available at extra cost, as well as all other chassis options such as automatic transmission and air conditioning, result in a change in weight. The additional weight of the individual chassis and engine variants as well as chassis options are always indicated in the chassis-related optional extras in the individual optional extras lists.
Please note: A maximum of 2 child seats are permitted on the bench seat in the living area, provided the table is removed and securely stowed. On an L-shaped seating group with fixed table, only one child seat is permitted beside the window. For this purpose, the side cushion must be removed and the table top moved towards the centre of the vehicle and locked in place. Please observe the exact instructions in the corresponding manual.
Please ensure that your observe the prescribed axle load when installing special parts attached to the rear of the vehicle, such as a motorcycle rack or trailer hitch.
The prices indicated are only valid for optional extras if fitted with the production of a new vehicle. The retrofitting of certain optional extras is sometimes not possible or associated with considerable additional costs.
This price list includes the series status at the time of printing. Despite checking the contents, errors can not be excluded. In the course of the model year, we reserve the right to change equipment and to make product improvements. The layouts are partially shown with optional extras available at extra cost, these are not part of the standard scope of delivery.
The water installation system is at least state-of-the-art as of 07/2011 (EG directive 2002/72/EG).

Before signing a sales contract, please inform yourself about our current product and series status with one of our approved Hymer dealers.

All prices are non-binding recommended retail prices in GBP including the legally valid value added tax (VAT), freight from Germany, first registration fee and pre-delivery inspection. For deliveries after the 31st of December 2020 import duties may apply. These are not included in the price and are charged separately.

Changes in price, design and equipment are possible without prior notice.

a) This is a recommended retail price based on UK retail prices. Prices in other countries may differ due to currency conversion and country-specific VAT, fees and import duties. For the latest information, please ask a local dealer for the prices applicable in your country.

This price list supersedes all previous ones.

Collection / Pick-up:
Collection / Pick-up of your Hymer motorhome at the factory is not possible.

FOOTNOTES

1) The length changes if optional extras such as trailer hitch, roof rails with rear ladder, Backrack+, bicycle rack, spare wheel incl. bracket on the outside of the rear wall, etc. are fitted.
2) Overall width corresponds the measurement incl. wheel arches (excluding exterior mirrors).
3) Height changes if optional equipment such as SAT antenna, roof rails etc. is fitted. The standard radio roof aerial is not included in the overall height.
4) The specified mass in running order corresponds to the vehicle with standard equipment and edition package.
5) The specification is the maximum technically possible trailer load, taking into account the total towing weight of the possible chassis variants. The gross train weight and the associated trailer load may vary depending on the equipment/chassis variant and the technically permissible gross vehicle weight of the towing vehicle Up to 12% incline: The engine power is inevitably reduced with increasing altitude. From 1000 m above sea level and every 1000 m thereafter, 10% of the trailer load must be deducted from the trailer weight. Your Hymer dealer will be happy to calculate the towing capacity of your individual vehicle. Please do not hesitate to contact them.
6) The number of persons stated may be reduced if the mass in running order increases. This increase occurs in particular if the engine version differs from the basic version, if optional extras are fitted and if a corresponding equipment version is selected. Use the weight information in the price list or talk to your Hymer dealer to make sure that the technically permissible total mass is not exceeded and that there is sufficient loading capacity for persons and items.
7) In the event of an accident, brakes are automatically locked to prevent a possible secondary collision.
8) SatNav device incl. automatic switching from starter to habitation battery and selector switch for driving and camping operation.
9) Smart Control: Simple status query of water levels and battery voltage via the operating unit of the SatNav device.
10) Depending on the type of smartphone and the software version, the level of possible smartphone use may vary.
11) Full smartphone integration in the multimedia system (e.g. Apple Car Play, Google Android Auto) can only be guaranteed if the 9" Multimedia SatNav system is installed ex works. Smartphone integration is not possible in the retrofit version.
12) Body colour Crystal Silver not available in combination with exterior cab colour Campovolo grey.
13) Only available in combination with Style package.
14) Adaptive Cruise Control active from 30 km/h.
15) Only available in combination with comfort habitation door.
16) Brackets for awnings feet are supplied loose.
17) The trailer hitch for motorhomes is only available in combination with the frame extension.
18) Depending on the vehicle equipment and loading, situations may arise in which the axle load is exceeded before the 350 kg of the rear garage are reached. When loading the vehicle, the axle loads and the permissible total mass must be observed.
19) With a total mass of 3,500 kg, the trailer load is 2,000 kg. With a total mass of 3,650 kg, the trailer load is 1,850 kg.
20) With a total mass of 3,500 kg or 3,650 kg, the trailer load is 2,000 kg.
21) GRP roof coating doesn't match the vehicle colour. The surface quality of the GRP coating does not correspond to a painted outer panel.
22) Surcharge to door with 1-way lock and window.
23) Roof AirCon and electric roof vent are mutually exclusive. Only one of these options can be ordered.
24) Due to manufacturer's instructions, please refer to the maximum speed of 150 km/h. Nevertheless, note the traffic regulations of your country as well as vehicle information.
25) Due to manufacturer's instructions, we recommend to order the gas filter when ordering the optional automatic gas bottle switchover with Crash Sensor and IceEx.
26) Only available in combination with automatic gas bottle change over system with Crash Sensor and Ice Ex.
27) The Hymer Smart Battery System (HY-Tec Lithium battery 50 / 150 Ah) consists of 3/6 individual LE300 lithium extension battery modules. This expandable solution increases the capacity and performance of the lead-acid batteries while increasing the efficiency and lifetime of the overall system. The lithium batteries are connected in parallel to the lead-acid batteries. In this process, the lithium batteries take over most of the charging cycles, while the lead batteries act as backup storage. The battery computer regulates the optimal charge/discharge and also displays the state of charge.
28) The Hymer Smart Battery System (HY-Tec-LFP-Battery 150) significantly extends the available electrical energy and thus the self-sufficient standing time of your motorhome. The HY-Tec-LFP-Battery offers a 200 % increase in available battery capacity with practically identical installation space (compared to standard 95Ah AGM_II batteries), combined with a weight saving of around 6 kg (approx. -22 %). This expandable solution increases the capacity and performance of the lead-acid batteries while increasing the efficiency and lifespan of the overall system. The lithium batteries are connected in parallel to the lead batteries. In this process, the lithium batteries take over most of the charging cycles, whilst the lead batteries act as backup storage. The battery computer regulates the optimal charge/discharge and also displays the state of charge.
29) Second habitation battery (95 Ah AGM), Hymer Smart Battery System (50 Ah LFP) and Hymer Smart Battery System (150 Ah LFP) incl. 18 A additional charger cannot be ordered at the same time or fitted inside one vehicle. Only one of these options can be ordered.
30) Electric floor tempering only available for walk-in area. Pedestal is heated with warm air and floor openings are not heated.
31) Carpet and electric floor tempering cancel each other. Only one of these options can be ordered.
32) Only available in combination with TV pre-installation / TV-bracket.
33) Second LED-TV only available in combination with first LED-TV.
34) Edition package not available in combination with other packages.
35) Mercedes-Benz Sprinter 31x chassis with permissible total weight of 3,500 kg cannot be uprated. Please keep this in mind when ordering.
36) Please note: Front passenger airbag can not be deactivated! Therefore, it is not allowed to attach child seats with restraint system against direction of travel on the front passenger seat.
37) Not available in combination with the option bumper, attachment parts and chrome grill in vehicle colour.
38) Only available in combination with habitation colour stone grey.
39) Only available in combination with cab colour stone grey.
40) The options " Chrome grill" as well as "Bumper, add-on parts and grill frame painted in vehicle colour" are only available in combination.
41) Only available in combination with Wet Wiper System.
42) Only available in combination with the optional cab seat heating and lumbar support for Original Mercedes-Benz cab seats.
43) Depending on the vehicle's equipment and load, there may be situations in which the axle load is exceeded before the 350 kg capacity of the rear garage is exhausted. When loading the vehicle, the axle loads and the permissible total mass must be observed.

44) When ordering this optional extra, standard variant is not included.
45) Not available in combination with All Wheel Drive.
46) Eco Start-Stop function not applicable with All-Wheel Drive option.
47) Spare wheel is always delivered with tyre pressure sensor.
48) When choosing the roof air con, the partition curtain to the sleeping area is omitted (ML-T 570 only).
49) Hymer Connect App also allows remote control via smartphone. Remote access and control via app and associated fees are included for a period of 2 years. After this period, various functions can still be used to a limited extent.
50) Not available in combination with the exterior colours: White and Stone Grey.
51) Not available in combination with exterior colour Hightech silver.
52) Only available in combination with CrossTrail edition package.
53) All Wheel Drive only available in combination with Mercedes-Benz Sprinter 419 chassis variant.
54) When ordering the optional All Wheel Drive, the overall height increases by approx. 9 cm.
55) Not available in combination with optional 17" rims.
56) Only available in combination with the Chassis package Plus or Premium.
57) All Wheel Drive is supplied with summer tyres as standard.
58) All Wheel Drive not available in combination with All Season tyres.
59) Engine compartment noise reduction insulation and engine / underride protection cannot be ordered at the same time. Only one of these options can be ordered.
60) Only available in combination with Comfort habitation door with window, blackout blind, integrated waste bin and 2-way lock.
61) Only available in combination with All Wheel Drive.
62) Optional tyre pressure sensors not available in combination with optional studded tyres.
63) 16'' studded tyres can only be ordered directly from the factory.
64) Remember that the maximum permissible speed with these tyres is 120 km/h.
65) Only available in combination with CrossOver edition package.
66) A jack is included with the order of the spare wheel.
67) Only available in combination with 16" rims.
68) The tyres fitted to the 16" spare wheel vary depending on the type of drive: The ML-T with All-Wheel Drive is fitted with winter tyres, while the Rear-Wheel Drive models are fitted with all-season tyres.
69) Not available in combination with bicycle rack.
70) The 16" steel spare wheel incl. studded tyres is only available in combination with the 16" steel rims (black) with studded tyres.
71) The 18'' Delta spare wheel incl. studded tyres is only available in combination with the 18" Delta wheels (black) with studded tyres.
72) When ordering the optional awning with dimmable LED lighting, the awning light is not included.
73) With a total mass of 3,500 kg or 3,880 kg, the trailer load is 2,000 kg. With a total mass of 4,100 kg, the trailer load is 1,780 kg.
74) Please note when ordering: Roof rack with rear ladder only available ex works. Retrofitting is not possible.
75) Roof rack with ladder and checker roof plate not available in combination GRP roof coating.
76) Solar panels not available in combination with roof rack and rear ladder and checker roof plate.
77) Not available in combination with spare wheel fitted on the rear wall (exterior).
78) ISOFIX - child seat mounting for one seating position only on the wall of the vehicle (not on the aisle).
79) Not available in combination with Gas-Warm water heating.
80) Gas-Warm water heating can be regulated separately via shut-off valve.
81) Only available in combination with optional warm water heating.
82) Only available in combination with the optional Hymer Smart Battery System 2.0 extension: 2nd 8 Ah habitation battery module (LFP) incl. additional charger.
83) Only available in combination with CrossOver or CrossTrail edition package.
84) Chassis package Premium only available in combination with chassis package Plus.
85) Only available in combination with exterior colours: Hymer white, Tenorite grey or Obsidian black.
86) When ordering the pull-down bed option, the standard panoramic skylight in the living area is not fitted.
87) Original Mercedes-Benz seats are swivelling, as well as longitudinally / tilt and height adjustable, headrest can be adjusted.
88) When ordering the original Mercedes-Benz 16" alloy rims in combination with the Mercedes-Benz Sprinter 41x CDI chassis, the weight variant 4,500 kg becomes possible.
89) Weight variant 4.5 t only available in combination with Original 16" Mercedes-Benz alloy wheels and must be ordered separately.
90) Not available in combination with the optional pilot seats.
91) When ordering the lowerable double bed above the seating group, the max. awning length is 4 m.
92) 680: The awning is only available in combination with the lowerable double bed above the seating group.
93) The permissible towing capacity depends on the chosen vehicle specification and the permissible gross vehicle weight. The applicable figures can be found in the technical specifications or the vehicle documents.
94) Hydraulic lift jack system option not available in combination with optional rear comfort steadies. Only one of these options can be ordered.
95) Only available in combination with automatic transmission and cup holder.
96) When ordering a lowerable double bed above the seating area, the 2 x 110-watt solar panel option cannot be combined with the Comfort 2.0 roof AirCon system (with a cooling capacity of 2,500 W) or the electric roof vent.
97) Not available in combination with winter package.
98) Only available in combination with the optional seating group bed conversion or Comfort L-shaped seating group or Vario table (extendable). Alternatively, the configuration is also available with the seating area bed conversion, including additional cushions and lowerable table.
99) Two Isofix places are provided.
100) Panoramic skylight in living area will not be fitted.
101) The 4 levels in the living area (ceiling, counter, floor and functional lights). Ambient lighting on ceiling in living/sleeping area. Suspended lighting in living area. Light temperature can be adjusted in ceiling area in living/sleeping area. All luminaires controlled via push-buttons can also be dimmed. In addition, there is an all-lights-off feature to switch off all lights inside the vehicle while in bed.
102) Separate oven above fridge only available in combination with 120 l fridge.

103) Not available in combination with pull-down bed.
104) Only available in combination with Equipment Line Premium.
105) 40 x 40 cm skylight not available in combination with optional front overhead lockers instead of pull-down bed.
106) B-MC I / T 600: Gas-Warm water heating and 5th seating are mutually exclusive. Only one of these options can be ordered.
107) The options 5th seat and mobile chair with smart office storage unit (instead of side couch) cancel each other. Only one of these options can be ordered.
108) The interior temperature in the rear can be adjusted separately using a manual control valve. This option is only available in combination with the comfort habitation door.
109) Only available in combination with the Living Comfort package.
110) Not available in combination with the optional 32" LED Smart TV in the living room.
111) Only available in combination with the cup holders.
112) An inverter is required for use in your own board network (without shore power). Alternatively, the awning can be operated via 230 V shore power.
113) The information given is the maximum towing capacity, taking into account the total towing weight. The total towing weight is 5,500 kg. The total towing weight and thus the towing capacity can change depending on the equipment/chassis variant. Please check with your dealer, they will be pleased to calculate the towing capacity of your individual vehicle.
114) When ordering this option, the space behind the LH cab seat / seating group is reduced. In the cab seats' rearmost locking position, the table and the seat may collide.
115) The options Round comfort table and Vario table cancel each other. Only one of these options can be ordered.
116) Only available in combination with the optional extendable Vario table.
117) Optional bed conversion kit for L-shaped seating group not available in combination with optional premium, round and extendable table.
118) TEC-Tower not available in combination with Thetford cooker/oven combination Caprice.
119) Not available in combination with oven above fridge.
120) Only available in combination with kitchen worktop made of solid surface.
121) Not available in combination with Hybrid cooker (gas and induction).
122) The induction hob can only be operated using 230 V shore power.
123) Not available in combination with the optional toilet vent.
124) Only available in combination with compressor fridge.
125) Front overhead lockers only available in combination with electric front roller shutter.
126) The optional bed conversion kit for the L-shaped seating group is only available in combination with the optional extendable and height-adjustable Vario table.
127) The peak power describes the maximum power specified by the manufacturer that an inverter can supply for a short period of time, for example to absorb high starting currents or sudden load peaks.
128) Vehicle dimensions and weights can be stored in the Mercedes me App.
129) Exterior colour Source Blue Metallic only available in combination with 18" alloy wheels Delta Klassik_B (Black) with studded tyres (All-Terrain).

LEGAL NOTES ON WEIGHT-RELATED INFORMATION

The weight specifications and tests for motorhomes are uniformly regulated throughout the EU in EU Implementing Regulation No. 2021/535 (until June 2022: EU Implementing Regulation No. 1230/2012). We have summarised and explained the key terms and legal requirements from this regulation for you below. Our dealers and the HYMER configurator on our website offer you additional assistance in configuring your vehicle.

1. Technically permissible maximum laden mass

The technically permissible maximum laden mass of the vehicle (e.g. 3,500 kg) is a mass specification set by the manufacturer which the vehicle must not exceed. Information on the technically permissible maximum laden mass of the model you have chosen can be found in the technical data. If the vehicle exceeds the technically permissible maximum laden mass in everyday driving, this constitutes an administrative offence which may result in a fine.

2. Mass in running order

In simple terms, the mass in running order is the basic vehicle with standard equipment plus a legally fixed standard weight of 75 kg for the driver. This essentially includes the following items:
- the unladen weight of the vehicle together with the bodywork, including operating fluids such as greases, oils and coolants;
- the standard equipment, i.e. all equipment items that are included as standard in the factory-fitted scope of delivery;
- the fresh water tank filled to 100 % in driving mode (driving fill according to manufacturer's specifications; 20 litres) and an aluminium gas cylinder filled to 100 % with a weight of 16 kg;
- the fuel tank, which is 90 % full, including fuel;
- the driver, whose weight – regardless of the actual weight – is generally specified as 75 kg in accordance with EU law.

Information on the mass in running order can be found for each model in our sales documents. It is important to note that the value for mass in running order given in the sales documents is a default value determined in the type-approval procedure and verified by the authorities. It is legally permissible and possible for the mass in running order of the vehicle delivered to you to deviate from the nominal value stated in the sales documents. The legally permissible tolerance is ± 5 %. In this way, the EU legislator accounts for the fact that certain fluctuations in the mass in running order occur due to variations in the weight of supplied parts as well as due to processes and weather conditions.
These weight deviations can be illustrated by means of an example calculation:
- Mass in running order acc. to sales documents: 2,850 kg
- Legally permissible tolerance of ± 5 %: 142.50 kg
- Legally permissible range of mass in running order: 2,707.50 kg to 2,992.50 kg

The specific range of permissible weight deviations can be found for each model in the technical data. HYMER makes great efforts to reduce weight variations to the minimum that is unavoidable for production reasons. Deviations at the upper and lower end of the range are therefore very rare; however, they cannot be completely ruled out technically, even with all optimisations. The real weight of the vehicle and compliance with the permissible tolerance is therefore checked by HYMER by weighing each vehicle at the end of the line.

3. Mass of the passengers

*The mass of the passengers is set a standard value of 75 kg for each seat provided by the manufacturer, regardless of the actual weight of the passengers. The mass of the driver is already included in the mass in running order (see no. 2 above) and is therefore not included again. In the case of a motorhome with four permitted seats, the mass of the passengers is therefore 3 * 75 kg = 225 kg.*

4. Optional equipment and actual mass of the vehicle

Optional equipment (also: additional equipment) includes, according to the legal definition, all optional equipment parts not included in the standard equipment which are fitted to the vehicle under the responsibility of the manufacturer – i.e. ex works – and can be ordered by the customer (e.g. awning, bicycle or motorbike carrier, satellite system, solar system, oven, etc.). Information on the individual or package weights of the optional equipment that can be ordered can be found in our sales documents. Optional equipment in this sense does not include other accessories that are retrofitted by the dealer or you personally after the vehicle has been delivered ex works.
The mass of the vehicle in running order (see no. 2 above) and the mass of the optional equipment fitted to a specific vehicle at the factory are together referred to as the actual mass. You will find the corresponding information for your vehicle after handover under item 13.2 of the Certificate of Conformity (CoC). Please note that this specification also represents a standardised value. Since the mass in running order – as an element of the actual mass – is subject to a legally permissible tolerance of ± 5 % (see no. 2), the actual mass may also deviate accordingly from the stated nominal value.

5. Pay-mass and minimum pay-mass

The installation of optional equipment is also subject to technical and legal limits: Only so much optional equipment can be ordered and fitted at the factory that sufficient free weight remains for baggage and other accessories ("pay-mass") without exceeding the technically permissible maximum laden mass. The pay-mass is calculated by subtracting the mass in running order (nominal value according to sales documents, see no. 2 above), mass of the optional equipment and the mass of the passengers (see no. 3 above) from the technically permissible maximum laden mass (see no. 1 above). The EU regulations stipulate a fixed minimum pay-mass for motorhomes, which must remain as a minimum for baggage or other non-factory-fitted accessories. This minimum pay-mass is calculated as follows:
*Minimum pay-mass in kg ≥ 10 * (n + L)*
Where: "n" is the maximum number of passengers plus the driver and "L" is the overall length of the vehicle in metres.
*For a motorhome with a length of 6 m and 4 approved seats, the minimum pay-mass is therefore e.g. 10 kg * (4 + 6) = 100 kg.*

To ensure that the minimum pay-mass is maintained, there is a maximum combination of optional equipment that can be ordered for each vehicle model. In the above example with a minimum pay-mass of 100 kg, the total mass of optional equipment for a vehicle with four permitted seats and a mass in running order of 2,850 kg should not exceed 325 kg:

3,500 kg technically permissible maximum laden mass
- 2,850 kg mass in running order
*- 3*75 kg mass of the passengers*
- 100 kg minimum pay-mass
= 325 kg maximum permissible mass of optional equipment

It is important to note that this calculation is based on the default value for mass in running order as defined in the type-approval procedure, without taking into account the permissible weight deviations for mass in running order (see no. 2 above). If the maximum permissible value for the optional equipment of (in the example) 325 kg is almost or completely exhausted, an upward weight deviation can therefore result in the minimum pay-mass of 100 kg being met mathematically using the default value for the mass in running order, although in fact there is no corresponding load capacity. Here, too, an example calculation for a vehicle with four seats, whose real weighed mass in running order is 2 % above the nominal value:

3,500 kg technically permissible maximum laden mass
- 2,907 kg real weighed mass in running order (+ 2 % compared to the stated value of 2,850 kg)
*- 3*75 kg mass of the passengers*
– 325 kg optional equipment (maximum permissible value)
= 43 kg actual load capacity (< minimum pay-mass of 100 kg)

In order to avoid such a situation, HYMER further reduces the maximum permissible weight of the total optional equipment that can be ordered on a model-specific basis. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by HYMER.
Since the weight of a specific vehicle can only be determined when it is weighed at the end of the line, in very rare cases a situation may arise in which the minimum pay-mass at the end of the line is not guaranteed, despite this limitation of optional equipment. In order to guarantee the minimum pay-mass even in these cases, HYMER will check together with your trade partner and you before delivery of the vehicle whether, for example, the vehicle is loaded up, seats are reduced or optional equipment is removed.

6. Effects of tolerances of the mass in running order on the pay-mass

Regardless of the minimum pay-mass, you should note that unavoidable production-related fluctuations in the mass in running order – both upwards and downwards – have a mirror-image effect on the remaining load capacity: If you order our example vehicle (see no. 3. above), for example, with optional equipment with a total weight of 150 kg, the calculated pay-mass based on the default value for the mass in running order is 275 kg. The load capacity actually available may deviate from this value due to tolerances and may be higher or lower. If the mass in running order of your vehicle is, for example, permissibly 2 % higher than stated in the sales documents, the load capacity is reduced from 275 kg to 218 kg:

3.500 kg technically permissible maximum laden mass
-2.907 kg real weighed mass in running order (+ 2 % compared to the stated value of 2,850 kg)
*-3*75 kg mass of the passengers*
-150 kg optional equipment ordered for the specific vehicle
= 218 kg actual load capacity

As a precaution to ensure that the calculated pay-mass is actually given, you should therefore take the possible and permissible tolerances for the mass in running order into account when configuring your vehicle.
We also recommend that you weigh the laden motorhome on a non-automatic scale before each journey and, taking the individual weight of the passengers into account, determine whether the technically permissible maximum laden mass and the technically permissible maximum mass on the axle are observed.

Notes

This brochure contains the series status at the time of printing. Despite checking the contents, printing errors cannot be ruled out. We reserve the right to make equipment changes, product improvements and price changes during the course of the model year. Please contact one of our authorized Hymer dealers for information on the current product, series and price status before concluding a contract.

Some of the vehicles are shown with optional extras that are included in the current price list and are available at an additional cost. The decoration shown is not part of the Hymer scope of delivery.

The details correspond to the European homologation regulations; these may change before the vehicle is purchased or delivered. Your Hymer dealer will be happy to inform you about any changes and the standard scope of delivery.
