Weight empty in running order: the weight empty in running order includes the weight of the driver (75 Kg) and 100 % of the water, 90 % fuel and 100 % gas tanks. Tolerance +/- 5%. The indicated weights empty in running order only take account of series equipment (+/-5%). The manufacturer reserves the right to alter this equipment list at any time.

- Accessories fitted as an option are not included when determining the weight empty. Their weight should therefore be deducted from the available payload.
- You may be able to find certain heavy accessories like large blinds or generators in the marketplace. The weight of these accessories should be deducted from the payload and could possibly lead to a reduction in the actual passenger numbers. It is therefore important not to exceed the maximum loads on axles and the technically acceptable loaded weight when the vehicle is fully loaded.
- Some models photographed in this catalogue may be shown with equipment supplied as an option. The characteristics of photographed models may vary from one country to the next. Despite the care taken in producing this catalogue, this cannot be viewed as a contractual document. CHAUSSON reserves the right to modify its models without prior notice. CHAUSSON cannot be held liable for any modifications made by its suppliers nor typographical errors when printing these documents. It is forbidden to reproduce, even partially, text or document. Do not litter the public highway.
- Your retailer is at your disposal to advise you and provide you with any additional information.

NB: All the technical characteristics for Chausson valid at the time of printing (August 2009) are provided for information only. They may be subject to modifications, often as a result of technical improvements.
The certificate of approval (issued by the vehicles inspection authorities) meets legal requirements, in particular with respect to weights and dimensions.
