Weight empty in running order: the weight empty in running order includes the weight of the driver (75 Kg) and 100 % of the water, 90 % fuel and 100 % gas tanks. Tolerance +/- 5%. The indicated weights empty in running order only take account of series equipment (+/-5%). The manufacturer reserves the right to alter this equipment list at any time.

- Accessories fitted as an option are not included when determining the weight empty. Their weight should therefore be deducted from the available payload.

- You may be able to find certain heavy accessories like large blinds or generators in the marketplace. The weight of these accessories should be deducted from the payload and could possibly lead to a reduction in the actual passenger numbers. It is therefore important not to exceed the maximum loads on axles and the technically acceptable loaded weight when the vehicle is fully loaded.

- Some models photographed in this catalogue may be shown with equipment supplied as an option. The characteristics of photographed models may vary from one country to the next.  (1) Certain heavy accessories, such as large blinds or electric generators may be on offer to you on the market. The weight of these accessories will be deducted from the payload and may require a reduction in the actual number of passengers. Thus, the maximum permitted loads on the axes and the PTAC (maximum permitted weight) must be adhered to during full loading of the vehicle.
