Touring Caravan Collection 2006

Compass 2006 Touring Caravan Collection

Improvements to the way in which we design and manufacture our vehicles and an annual review of all our ranges ensures that our customers receive the very latest components, styling and refinement that are synonymous with Compass touring caravans today. To keep a touring caravan range completely unaltered for a number of years would be to do a disservice to our retailers and owners alike.

Our focus is on continuous improvement.

Whilst the overall look and feel of a particular model range may appear unaltered next to a fully re-upholstered touring caravan with a striking new graphic, the unseen detail and the myriad of new components used across the ranges keep Explorer at the cutting edge of touring caravan design in the UK.

We work in partnership with our suppliers and customers alike to design and engineer vehicles that meet the exacting and ever escalating needs of our owners.

To stand still in an ever more demanding market place would be to miss out on endless opportunities and limit our desire to keep our touring caravans 'fresh'.

compass

Compass - What's New for 2006

'So Comfortable' Mattress

Supplied as standard on the Rallye range, the Exclusive 'So Comfortable' pocket sprung mattress is a traditional top quality deep sprung system with hundreds of springs encapsulated in individual pockets unsurpassed in the ability to supply all over comfort and support with no roll together.

All fixed double beds in the Compass range now come with a one piece mattress (upholstered in Corona and Omega) and one piece metal bed frame with easy lift gas struts. This is designed to give you more comfort and easier access to the under-bed storage area.

Privacy Windows

The new Seitz side and rear privacy windows are exclusive to The Explorer Group in the UK. They allow you to see out, but prevent your neighbours from seeing in. The new windows help to reflect light that damages upholstery and can assist in keeping the interior cooler on the brightest of sunny days.

3 Burner Hob

The new Spinflo 3 burner hob with high speed multifunction burner can accommodate large sauce pans up to 25cm, round and flat bottom woks up to 36cm and frying pans up to 24cm.

Stainless Steel Sink

The Argent stainless steel sink comes complete with a space saving removable drainer.

Rallye models also benefit from a detachable cup, plate and cutlery drainer that stores neatly in the bespoke silver washing up bowl supplied with an integral chopping board.

The sink and hob covers are made from virtually unbreakable Chinchilla glass; totally hygienic, odour, scratch and stain resistant, and able to withstand hot pans and roasting dishes.

Modified BPW A-Frame & Handbrake

All Compass models feature the new modified A-frame to the BPW Swing V-Tech chassis. The new design features a more centrally positioned jockey wheel to aid caravan manoeuvrability when un-hitched. The push button release has been removed from the new single lever action handbrake making the operation smooth and simple.

See the full standard features and options listings and discover all of the new improvements for 2006.

compass

636

compass

Compass Corona 2006

Corona is an impressive value for money starter range. For 2006 Corona receives an external and internal fixture and fittings upgrade along with new upholstery and Aswald Ash furniture.

2006 also sees the addition of the new 482 end washroom 2 berth layout to the 9 model Corona range.

Corona - Exterior Styling

The new modified A-Frame on the BPW Swing V-Tec chassis is the main change to the exterior of the Corona for 2006.

The new position of the jockey wheel aids manoeuvrability, whilst the easy action handbrake could not be simpler to operate.

A new A-Frame cover neatly conceals the jockey wheel when retracted and gives a cleaner finish to the front of the caravan. When not in use, the hitch cable plugs fit snugly into the bespoke recessed mouldings on the cover that help protect the pins from the elements.

At the rear of the caravan is a new, brighter, and more highly reflective rear visibility panel to aid night time safety whilst towing.

Corona - Interior Living Space

New green and gold check sprung upholstery complemented by Capiro gold curtains and pelmets give the interior of the Corona a modern, bright and lively feel. Further enhanced with upholstered curtain tiebacks and coordinating gold and green trim scatter cushions.

The internal veneered furniture is made from the new lighter and more distinctive Aswald Ash, whilst all worktops are finished with decorative laminate.

Another simple and practical improvement is the re-design of the occasional table top on the front chest of drawers. Rather than having to remove items from the top of the unit to flip over the table top, it simply slides out from underneath and drops neatly into place (parallel lounge models only).

A new Horrex full door fly screen supplies practicality whilst the un-tensioned, easy slide action is a major improvement.

The Kitchen

The new Spinflo 3 burner hob with large high speed multi-function burner gives a greater range of options when using larger pans for cooking. Add to this the new Prima Mark3 oven and the cooking of any meal is easily accommodated.

Food preparation is also given a helping hand with the addition of the new space saving sink with bespoke silver washing up bowl and removable drainer, freeing up more work surface when you need it the most.

OMEGA

505

Compass Omega 2006

The 2006 Omega is the next step up from the Corona and is packed with a host of improvements that give this range a truly modern look.

With more refinement and a higher specification the Omega offers superb value for money.

2006 sees the addition of the new single axle 484 rear fixed bed layout.

Omega – Exterior Styling

Black coach lines with updated blue and green wave style graphics give the Omega a contemporary new look.

Omega also benefits from the new modified A-frame and a new easy action handbrake on the BPW Swing V-Tech chassis. The most stunning addition though is the new Seitz privacy side and rear windows.

These not only look fantastic, they also offer a host of benefits including privacy from the neighbours, a cooler caravan interior and additional protection from the sunlight for upholstery and curtain fabrics.

The Omega also comes with heavy duty corner steadies and an exterior access door with 230v output socket as standard.

As with the Corona a new, brighter, and more highly reflective rear visibility panel to aid night time safety whilst towing is also added for 2006.

compass

524

505

Omega - Interior Living Space

The very cosy Delta red and gold 'Poppy' colour scheme of the sprung upholstery remains for 2006. This is perfectly matched with loose lay terracotta removable carpets with bound edges. This attractive interior is further enhanced with contrasting deep red curtains, scatter cushions with accented styling and upholstered tiebacks.

Toronto Maple has been replaced with Aswald Ash internal veneered furniture.

The front chest of drawers conceals the new design slide out occasional table (parallel lounge models only).

A new Horrex full door fly screen supplies practicality whilst the un-tensioned, easy slide action is a major improvement.

The Kitchen

The new Spinflo 3 burner hob with large high speed multi-function burner accommodates larger saucepans and even woks. Add to this the new Prima Mark3 oven and the option of a microwave oven and cooking on site is as easy as at home.

The Argent stainless steel linen effect sink comes complete with a chopping board and removable drainer that store neatly inside the bespoke silver washing up bowl.

The space saving sink frees up more work surface making meal preparation even easier.

All worktops and occasional table tops are finished with 'Carrera Envision' decorative laminate.

Compass Rallye 2006

The premium Rallye is the most well-equipped and luxurious of the Compass range and receives a striking new exterior makeover. Despite the top of the range status, and superb looks, the Compass Rallye continues to provide superb value for money.

Rallye – Exterior Styling

Black coach lines with chrome edged graphics, enhanced blue/green wave style graphics and the simply stunning new Seitz privacy windows make the Rallye stand out from the crowd.

Outside you will also find a modified A-frame and a new easy action handbrake on the BPW Swing V-Tech chassis, highly reflective rear visibility panel, heavy duty corner steadies and an exterior gas barbecue point.

The exterior access door opens to reveal a handy 230v output socket, ideal for when you want to watch TV in your awning.

compass

Rallye - Interior Living Space

Inside the 2006 Compass Rallye is packed with a host of improvements including Explorer's exclusive 'So Comfortable' domestic quality pocket sprung mattress to fixed bed models. As the name implies this mattress is 'So Comfortable', you are assured of the best night sleep you may ever have had in a caravan.

Rallye has been given a full make over in the striking new Angelino blue upholstery with sumptuous chocolate brown and cream coordinates. This interior defines what Compass is all about, superb styling, very practical and excellent value for money.

Aswald Ash veneer furniture and wall board give the interior appearance real warmth. Whilst all worktops and occasional table tops, are finished with 'Quartz Envision' decorative laminate.

Colour coordinated Remis folding doors replace the heavy solid wood partition doors.

The Kitchen

The new Spinflo 3 burner hob with high speed multifunction burner can accommodate large sauce pans up to 25cm, round and flat bottom woks up to 36cm and frying pans up to 24cm. Add to this the new Prima Mark3 oven and microwave oven supplied as standard and a simple cooked breakfast to a full evening meal are easily catered for.

The Argent stainless steel linen effect sink comes complete with a chopping board and removable drainer, as well as a cup, side plate and cutlery drainer that clips onto the Chinchilla glass sink cover. All store neatly inside the bespoke silver washing up bowl.

The space saving sink frees up more work surface making meal preparation even easier.

Dometic's new RM7291L 90ltr power fridge is a new addition and elegantly styled with its curved Aswald Ash veneer door. The Rallye 634 model goes one further with the new 7651L fridge freezer.

Compass Security Systems

Theft Deterrent, Prevention and Security of Your Touring Caravan

This is taken very seriously with Compass. That is why we have provided a combination of standard features and optional extras designed to deter and prevent thieves from stealing your property. And in the unlikely event that they should succeed, aid the identification and speedy recovery of your investment and assist in the prosecution of the thief.

Microtag©

Supplied as standard with every Compass touring caravan, MicroTag© is an innovative and technologically advanced property tracing system that can be easily applied to all your valuables. Marking your property with Microdots not only deters theft, but will also help lead to the successful prosecution of the thief and the recovery of your stolen valuables.

Why Use Microdots? - In order for the Police to successfully prosecute, it is necessary to identify the true owner of stolen property. Marking your property with Microdots is the easiest way to ensure your valuables are quickly identified. You can Microdot all kinds of property against theft including your touring caravan, motor vehicles, televisions, bicycles, jewellery, in fact anything of value to you, that will also be of value to a thief.

In the event of theft or loss the police can locate the MicroDot by using an ultra violet light. The MicroDots are then read using a MicroDot reader, or a conventional microscope. Each MicroDot is laser etched with a freephone helpline and your own unique number which is registered on the International Security Register which is manned 24 hours a day, 365 days a year.

Robstop WS3000 Hitchlock

The Robstop WS3000 hitchlock is made of high-grade steel alloy with a cylinder lock. It is very simple to operate and prevents unauthorised coupling and disconnection. It also prevents dismantling of the coupling itself. The safety ball covers the ball head room of the WS3000 creating an additional means of protection (optional extra).

Anti-Wind Corner Steadies

The rear corner steadies on all Compass touring caravans have a special cawling that allows for the precise positioning of a security bolt. Once the corner steadies are down, the bolt is put in place and padlocked*. This prevents the potential thief from being able to lift the corner steadies making it extremely difficult to tow the vehicle away.

Electronic Tagging

In conjunction with the CRIS registration scheme, all Compass touring caravans are electronically tagged during manufacture for added security and ease of vehicle identification.

Robstop WS3000 Hitchlock

*padlock not supplied

Anti-Wind Corner Steadies

CRiS - The Caravan Registration and Identification Scheme

CRiS is the national register of UK manufactured touring caravans. Established by the National Caravan Council (NCC) in conjunction with HPI Ltd. All Compass caravans are recorded on the CRiS database by their unique 17 digit Vehicle Identity Number (VIN). This VIN and the caravan description are recorded on the Touring Caravan Registration Document, which is sent by CRiS to the caravan's registered keeper.

CRiS issues Touring Caravan Registration Documents which are the equivalent of the log books issued by the DVLA for cars - the Touring Caravan Registration Document confirms the name of the registered keeper, the VIN and full vehicle description.

Window Etching & Chassis Marking

The VIN number is stamped onto the chassis of the touring caravan and etched onto all of the windows acting as a further deterrent.

Explorer Protect - Autowatch Alarm system

The Explorer Protect system, is fitted as standard on the Rallye range (optional extra on Omega and Corona).

Manufactured by Autowatch, The Explorer Protect system is designed to give years of trouble free operation. Made with only the highest quality components and using state of the art technology you can be assured that your caravan has the best electronic protection available.

Each caravan alarm is installed with a Passive Infrared Detector (PIR), a wireless sensor that detects movement in the caravan and transmits a radio signal to the alarm module. If the alarm is on the siren will sound. A leg sensor, fully sealed against dust and water, detects if the corner stabilising leg is being raised or lowered and transmits a coded radio signal to the alarm. Additional sensors can be purchased from your retailer to enhance security.

Product Development

Continuous Improvement, Product Development & Testing

The construction methods & the running gear and axles used in our touring caravans need to satisfy exacting requirements. All new touring caravans need to be as safe as possible & have the best build quality, issues that are taken very seriously with Compass.

The large surface areas of the front & side walls of a caravan are fully exposed to head & side winds. These factors, combined with the weight of the vehicle & the higher centres of gravity present special challenges to our engineers.

Every new & ongoing development is accompanied by extensive studies & driving tests, many conducted jointly with or by our supply partners.

Stability and handling of a high performance car may rely on firm suspension, but not many cars have cupboards

full of crockery! Driving tests conducted by Explorer & BPW at the DAF Vehicle test centre in Eindhoven & the Dutch Safety Inspectorate in Lelystad, were used to establish the current touring caravan designs. During these tests every possible influence on the damping of caravan movement whilst being towed was painstakingly examined.

On the test track manoeuvres were undertaken in all driving conditions & on a variety of road surfaces. This included endurance tests on the notorious Belgium pavé road that proved the strength, build quality & reliability of our caravans over the equivalent of 13,500km. We have even undertaken a 24-hour high speed endurance trial around BMW's performance centre track, the purpose built Rockingham Raceway, as a means of testing both high speed stability & vehicle reliability in a way that far exceeds normal conditions experienced by our customers.

The information and data obtained in all of these tests is used to develop the caravan and running chassis to the highest standards, as in the case of our braking system that achieves deceleration values far in excess of statutory regulations.

BPW Swing V-Tec Chassis

The 2006 Compass range of touring caravans features the advanced Swing V-Tec axle-chassis system from BPW, quite simply because we believe it to be the best available. Our rigorous testing at UK and European proving ground & vehicle test track facilities has proven its superior reliability & stability over other chassis makes available.

BPW are the European market leader with over 10 million axles sold world wide, & an enviable reputation for producing high quality equipment. BPW axle & suspension systems are designed for high performance, reliability and low maintenance.

The main advantages of the Swing V-Tec are:

- Improved ride stability due to a dynamic self-steering effect (un-noticeable in normal towing conditions), reducing the risk of swaying, sideways movement and side wind sensitivity.

- Greater stability even with sudden steering manoeuvres giving a wider margin of safety in an emergency situation.
- Excellent cornering ability due to increased tyre contact with the road, minimising body roll.
- Safer at high speed.

Winterhoff Stabiliser

The Winterhoff WS3000 is a convenient single lever system for easy coupling and stabilising. The special friction pads in the coupling are pressed against the tow ball of the towing vehicle under high spring pressure, thus suppressing dangerous snaking and pitching motions of the touring caravan before they build up.

The main advantages of the WS3000 stabiliser are:

- Dampens snaking and pitching of the touring caravan
- Allows more space between rear door mounted spare wheels, common on 4x4 tow vehicles and the open stabiliser
- Easy to read wear indicator
- Clip system for easy replacement of the friction pads
- Ease of engagement and disengagement

When combined with the Swing V-Tec chassis, the WS3000 offers the ultimate towing experience, but don't just take our word for it...

The RWTÜV Essen, as an objective, independent organisation carried out detailed comparative tests of all towing ball couplings and stabilising gear on the market during July and August 2004. These tests included criteria such as safety during towing, construction type related limited values, handling and maintenance of each system with a variety of weights. The comparative investigations were carried out at the Institute for Vehicle Technology in Essen, Germany and on the test area at Trier-Föhren Airfield. The test winner was the Winterhoff WS3000.

Compass Owners Club

As a Compass owner, you are eligible to join the Compass Owners Club. With a huge number of rallies and wide range of activities to take part in, membership adds a whole new dimension to the fun you can have and the friends you can make whilst enjoying your touring caravan. For more information about the Compass Owners Club follow the link on the Explorer Group website, visit the owners club site, or contact:

Mrs Anne Byers, Membership Secretary,
The Compass Owners Club,
1 Greenacres, Stainton,
Cleveland, TS8 9BN.

The Compass Promise

For over 25 years value for money has been central to the design and development of Compass touring caravans. Through the building and rigorous testing of prototypes, to construction, fitting and finishing. The wide range of products we currently offer embraces every imaginable lifestyle.

All of The Explorer Group's touring caravans comply with relevant European standards and UK Road Vehicle Regulations.

Peace of Mind

We recognise the value that peace of mind affords on the open road. So in addition to using the latest materials, components and manufacturing techniques, we offer a range of warranties: 5 Year Water Ingress Guarantee and 3 Year Comprehensive Factory Backed Warranty. An exceptional package of warranty cover designed to give you long-term peace of mind, and enhance the resale value of your investment.
