**RAPIDO**  
CAMPING-CARS

*Your next stage in the art of travelling*

# RAPIDO BODYWORK MAKES ALL THE DIFFERENCE

An exclusive manufacturing method

## **AMERICAN GEL-COAT : REINFORCED PROTECTION**

For some years RAPIDO has been using, exclusively and in secret, the " American " gel-coat. This " high technology " material protects the bodywork of your camping-car from climatic aggressions and in particular from UV.

The quality of this white resin (gel-coat) is essential. It gives your camping-car its long life, its watertightness and its smooth, brilliant look.

## **POLYGLACE® POLYESTER : UNEQUALLED BRILLIANCE**

The Polyglace® polyester which clads the panels of RAPIDO camping-cars results from an exclusive technique. Its manual manufacturing process guarantees a perfectly smooth bodywork appearance of unequalled brilliance. This quality results from a greater thickness of resin.

## **POLYESTER PANELS : INCREASED STRENGTH**

Panels coated with polyester possess good resistance to the impact of hail, scratching by branches and other small impacts. They are easy to repair.

## **ALU-FIBER® :**

Available only for the Serie 70+

Rapido is expanding its technological choices by offering Alu-fiber®. This technology is based on our know-how in polyester materials and creates an innovation by adding a sheet of aluminium affixed to a polyester coating.

Alu-fiber® combines the qualities:

- of polyester, with its capability of withstanding impacts,
- of aluminium, which represents an excellent supporting medium for metallic paint, which lends depth to the particular hue.

Alu-fiber® is a variation in style for the RAPIDO range, a new aesthetic, in the purest traditions of RAPIDO quality.

# Safety

## ABS (Antilock Brake System)

This prevents the wheels from locking during braking, optimises stopping distances and, above all, ensures that the motor home can continue to steer.

## ASR (Anti Slip Regulation)

When there is loss of traction, this anti-skid system brakes the drive wheels to restore traction.

## ESP (Electronic Stability Program)

ESP is an anti-slide system capable of braking one or more wheels to return the vehicle to its centreline.

(Standard on 9M, option on 7 and 9F)

## SECUMOTION

Developed by Truma, the Secumotion system enables gas to be used while travelling to heat the living area or the water circuit. It is equipped with Duoconfort, which automatically switches over the gas bottles when one is empty.

## Safety belts integrated on all the seats in the A-class series

RAPIDO has chosen to fit all the cab seats in the A-class series with retractable safety belts with the receiver built into the seat. This enables the belt to adapt better to everyone's shape.

## Belts for the rear passengers

The models with seats facing the road, including several side benches, are fitted with belts in the rear.

## Driver's airbag

A driver's airbag is available as standard on all the models in the range.

# TECHNICAL INFO

## Elegance furniture

New "Elegance" furniture with a warm, highly coloured "Indian Summer" maple wood hue.

Where does this term "Indian Summer" come from? It is a region of the world, Canada, from which our maple wood comes, which provides a highly coloured end of September late season. The forests are decked in magnificent, orangey-red colours... This period is very often accompanied by exceptional luminosity and a return of the heat.

This warm period perfectly describes the sensation and the emotions triggered by the new Elegance furniture "Indian Summer" hue.

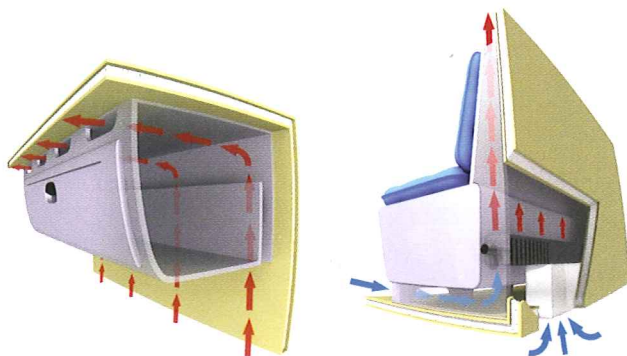

## ALDE heating system

Tested by us in the Scandinavian countries and developed in collaboration with the ALDE team, RAPIDO offers a new mode of heating, which provides heat harmoniously distributed throughout the living area, creating a genuine sense of well-being.

It consists of a central heating unit comprising a gas boiler and a heat exchanger. The boiler heats a liquid composed of 60% water and 40% glycol. The water/glycol mixture circulates in the system through the pipes and the convectors by means of a 12V circulation pump.

The convectors, placed along the exterior walls, heat the air, which rises, heating the furniture units and partitions. Because warm air rises, a barrier of air is formed, which insulates the windows from the cold. The temperature inside the living area is regulated by means of an air thermostat:

- Available as an option on 9086dF and 9090dF models.

## Reversing camera

The whole Rapido range has the advantage of a reversing camera (except for Series 7 and 9F, where it is an option). The camera is connected to a 6,5-inch screen with built-in speaker, built into the dash board. The driver can therefore hear the instructions being given by someone behind the vehicle! Manoeuvring has never been so easy!

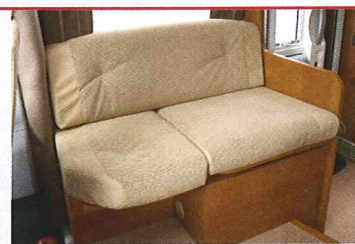

## Modular seats

To comply with our customers' wishes, Rapido has developed new bench seats with modular seats.

From the "Living room" position around the table, you can reconfigure the seats so that they can be used facing the road with a seat belt during a trip.

A set of sliding or opening panels makes it easy for you to modify your bench seat to your requirements.

## Autoradio

### FIAT low-profiled and A-Class models

#### PIONEER - RDS MP3 /CD – DEH 1000 E

The DEH-1000E is equipped with exclusive Pioneer D4Q, "Digital for Quality" technology, improving radio reception by more than 150% and considerably reducing distortion and interference. Because it follows the RDS system perfectly, this system provides exceptionally stable reception from your favourite stations.

You can also listen to your favourite tracks in your vehicle. The DEH-1000E has an auxiliary input on the front (jack type), enabling you to connect your digital music directly to the car radio.

### Serie 9M MERCEDES A-class

#### IXIT - RX 87

This high technology product has a high-definition LCD colour screen built into the dashboard, enabling you to:

- Play DVDs via its "DVD player" function,
- Listen to the radio,
- Listen to your own selection of music by connecting it to an IPOD or MP3 player by means of an USB or SD card.

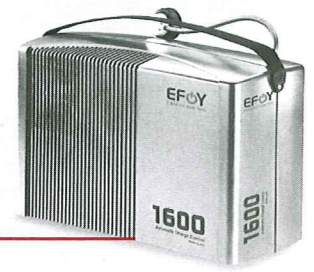

## Navigation + DVD player

Offered as an option across the range, the Pioneer AVIC-F900BT navigation system enables you, through a single colour screen built- into the dashboard, to:

- Follow your route through the European roads; with the SD card (supplied), you have all the maps of Europe and all the service areas in Europe,
- Enjoy a rear view when manoeuvring thanks to the reversing camera,
- Play DVDs via its "DVD player" function,
- Listen to the radio,
- Listen to your own selection of music by connecting it to an IPOD or MP3 player by means of an USB or SD card.

## Fuel cell

Have all the power you need, wherever you are.

The fuel cell is a power source located upstream of the battery.

It constantly monitors the status of the battery charge and automatically starts to recharge it as soon as the charge falls below a given threshold. Once the battery has been recharged, the fuel cell automatically returns to standby mode. You no longer need to keep an eye on the battery voltage indicator.

The model offered by RAPIDO is the EFOY 1600.

No mechanical parts are involved in converting the liquid fuel (methanol) to electrical power, which provides silent operation.

Your distributor can provide you with the supply of methanol.

The fuel cell is offered:

- As standard on the 9MH and 9009dFH series,
- As an option, on the 70+ and 9M series.

## Symphonie audio pack\*

Experience your emotions to the full while listening to your preferred music with XXL acoustic comfort.

This pack consists of:

- 1 Pioneer subwoofer, combining together a cast aluminium heat sink, a woofer with an oval aluminium cone and a built-in 150W amplifier, providing very powerful bass. It also contains a cabled remote control for refining your settings,
- 2 additional speakers in the living room,
- And a further two speakers in the bedroom.

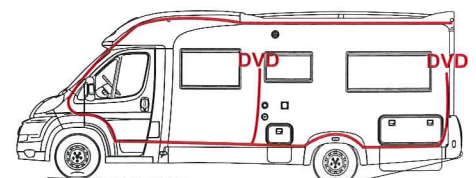

The sound is therefore harmoniously distributed throughout the living area and provides true listening quality.

•Available only on factory order.

## Double pre-cabing for DVD player

RAPIDO keeps pace with innovation. Nowadays, some sophisticated car radios\* can play DVD films ; RAPIDO has run an audio/video cable from the dashboard to the TV set especially for this purpose. A second audio/video cable allows to connect a DVD player near the TV cupboard.

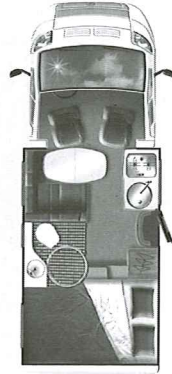

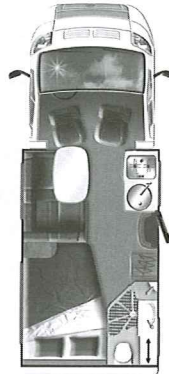

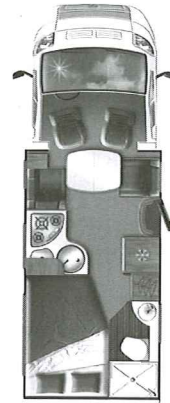

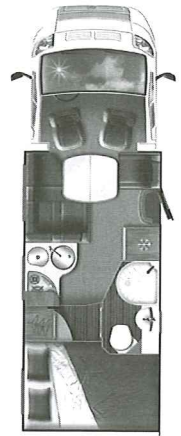

\*Available as an accessory from your distributor.

CHARACTERISTICS  
AND CARRIERS BY MODEL**REMEMBER**

When purchasing a RAPIDO, the unladen weight includes the weight of the vehicle's standard equipment. The unladen weight of camping-cars is determined in compliance with the laws currently in force and includes the vehicle in working order, the driver (75kg), the gas bottle, fresh water and fuel tanks up to 90 % of their capacity with a tolerance of +/- 5 % (in accordance with European Directive EC 92/21).

It is therefore the responsibility of the user to adjust the load and the number of passengers on board according to the payload and the weight of any additional equipment he installed or has had installed in the vehicle.

• Option, ● = Original, - = Not available

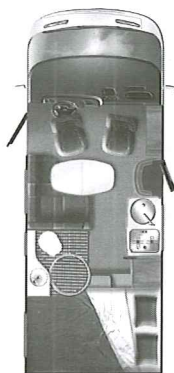

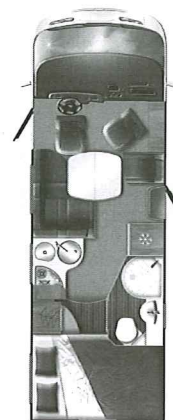

The optionally installed accessories are not included in the definition of the vehicle's unladen weight. The weight of these elements must therefore be deducted from the vehicle's payload.

CHARACTERISTICS  
AND CARRIERS BY MODEL**REMEMBER**

When purchasing a RAPIDO, the unladen weight includes the weight of the vehicle's standard equipment.

The unladen weight of camping-cars is determined in compliance with the laws currently in force and includes the vehicle in working order, the driver (75kg), the gas bottle, fresh water and fuel tanks up to 90 % of their capacity with a tolerance of +/- 5 % (in accordance with European Directive EC 92/21).

It is therefore the responsibility of the user to adjust the load and the number of passengers on board according to the payload and the weight of any additional equipment he installed or has had installed in the vehicle.

0 = Option, ● = Original, - = Not available

The optionally installed accessories are not included in the definition of the vehicle's unladen weight. The weight of these elements must therefore be deducted from the vehicle's payload.

CHARACTERISTICS  
AND CARRIERS BY MODEL**REMEMBER**

When purchasing a RAPIDO, the unladen weight includes the weight of the vehicle's standard equipment. The unladen weight of camping-cars is determined in compliance with the laws currently in force and includes the vehicle in working order, the driver (75kg), the gas bottle, fresh water and fuel tanks up to 90 % of their capacity with a tolerance of + / - 5 % (in accordance with European Directive EC 92/21).

It is therefore the responsibility of the user to adjust the load and the number of passengers on board according to the payload and the weight of any additional equipment he installed or has had installed in the vehicle.
