recognise with our  
porthole branding.

## FOR THE HOLIDAY YOU CHOOSE

When you select your caravan holiday and camping becomes something more important – when it becomes a lifestyle, and you are driven by a passion for camping life, you automatically expect more from your equipment. An awning is an investment – not only a financial one, but an investment in the family's time and happiness.

The awning is your window to the world when you go camping – an outdoor room where the evenings are extended and chilly days can be forgotten.

As a focal point for family and friends it really is a holiday essential.

Your choice of awning is fundamental, because you will spend so much of your holiday inside it. An Isabella awning is created to satisfy customers' requirements for extreme durability, immense practicality and an ideal living environment– all brought together in attractive designs, right down to the last detail.

# penta concept & penta

- SAFE: Strong construction for permanent pitching
- UNIQUE: Bold five sided shape
- SPACIOUS: 350cm deep
- LIGHT & AIRY: Roof skylights and ventilation panel(s)
- PROTECTIVE: All round canopy

## LIVING SPACE WITH A HEART

After almost 25 years success a NEW Penta Concept is launched. The new model is made with exclusive Isatex coated polyester – extremely easy to maintain and geared to withstand the elements for extended periods. The original Isacryl Penta is also available - made with fibre-dyed Acrylic front & side walls that are strong, colour-fast and durable. The all-round canopy is available on both Penta models and prevents dirt and grime running down the sides, so you can spend your holiday relaxing and on your favourite activities rather than cleaning your awning! When even more space is needed an annex (page 32) can be added.

For hot days the foil-covered mosquito net in the side Penta (1) Penta Concept (2) improves the ventilation and helps create the perfect indoor climate while keeping annoying insects at bay. The unique transparent roof panels and large window panels create a lovely, light atmosphere, where you can enjoy the spacious interior in the company of family and friends.

PENTA

Plenty of doors and ventilation options, together with the transparent skylight panels, make the Penta models extremely comfortable.

A. Door canopy see page 30. Annex p. 32 and other options are available p.40.

# forum

◦ Depth: 350 cm (incl. 100 cm porch)

◦ A-measurement (from-to): 900-1225 cm

◦ Canvas material: Fibre-dyed Isacryl

◦ Frame: CarbonX fibreglass or Zinox steel poles

*Please see page 40 for recommended optional extras and additional technical information.*

- FLEXIBLE: Eight standard set up options
- STYLISH: Breathtaking ISACRYL colour combination
- STRAIGHTFORWARD: Easy Frame assembly
- SPACIOUS: 350cm Deep
- PERSONAL: For sitting or touring, CarbonX fibre or Steel frame, Add the extra front panel for six more layout choices

## VARIETY IS THE SPICE OF LIFE

If you like variety, the Forum is the awning for you. You'll enjoy the special bay area which can be created by moving one, or both, front panels inside to create a covered porch along the entire front or just half of the awning. The front panels are also interchangeable, allowing you to position the door in the side of your choice. The design allows you to create a separate space at the front of the awning for greater flexibility when you purchase an extra front panel.

The Forum is a large permanent pitching awning which is equally suitable for touring if you're heading south for a few weeks. The lightweight CarbonX frame means that the awning is easy to assemble. The Forum has a built-in ventilation net panel in the right-hand side panel to make a comfortable indoor climate.

With a depth of 350 cm across its entire width, this model is one of our largest awnings providing an elegant and practical holiday home.

Having lots of options for doors and flexible front panels gives you a free hand to arrange your awning as you wish.

Use the standard panels & veranda pole to create layouts and styles for individual holiday needs.

A. An additional front panel (optional extra) provides six more layout options.

NEW

• Depth: 300 cm

• A-measurement (from-to): 900-1225 cm

• Canvas material: Isatex (coated polyester)

• Frame: CarbonX fibreglass or Zinox steel poles

*Please see page 40 for recommended optional extras and additional technical information.*

# commodore concept

- NEW: Design, colours & coated polyester material
- LARGE: 300cm Deep
- MULTI-USE: For siting or touring, CarbonX fibre or Steel frame
- FRESH: Ventilation panels in front & both sides
- PRACTICAL: Easy to clean, easy to assemble

## PERFECT FOR BOTH PERMANENT PITCHES & TOURING

At 300 cm deep, the new Commodore Concept awning is spacious enough for the entire family and the extra width door openings in the front provide easy access to get a pushchair in and out of the awning.

The new model is made of coated polyester, which makes it easy to remove dirt and dust with a quick wipe. This exclusive material has a textured surface adding light and life to the canvas. The large window sections create a bright, friendly room for maximum enjoyment. Integrated ventilation net panels in the front and both side panels generate the best possible indoor climate, wherever your travels take you. The Commodore can be used as a siting awning yet the frame is straightforward for use on quick weekend breaks and touring holidays. Especially for touring, we recommend the ultra-light and very strong CarbonX fibreglass frame.

Plenty of doors and ventilation options create a comfortable and attractive lounge area in the Commodore Concept.

A. For more space two annex options are available (for more details, see page 32).

# commodore royal

• Depth: 300 cm

• A-measurement (from-to): 850-1225 cm

• Canvas material: Fibre-dyed Isacryl

• Frame: CarbonX fibreglass or Zinox steel poles

*Please see page 41 for recommended optional extras and additional technical information.*

- CLASSIC: Isabella Design
- LARGE: 300cm Deep
- MULTI-USE: For siting or touring, CarbonX fibre or Steel frame, Easy to assemble
- AIRY: Ventilation panels in side and both front panels
- DURABLE: Strong, Colour fast, Breathable 295 g/m<sup>2</sup> ISACRYL

## SPACIOUS FOR TOURING OR PERMANENT PITCHING

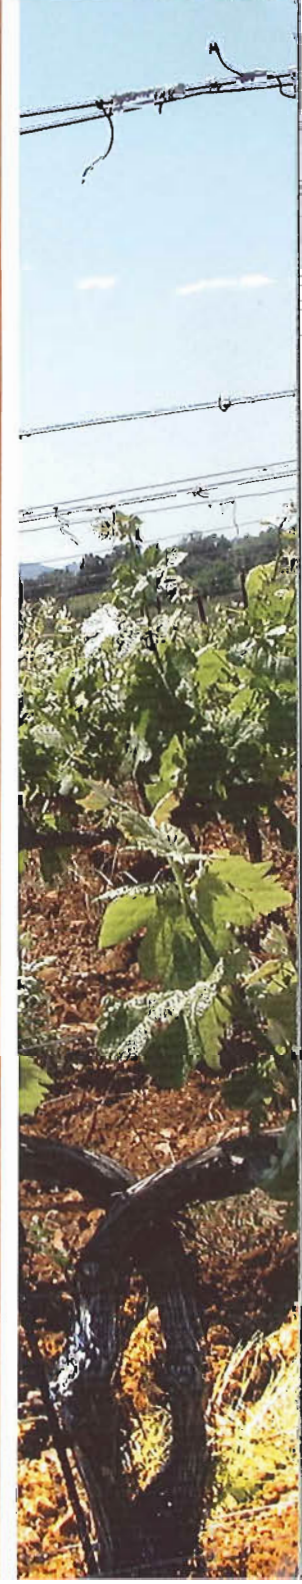

The classic Commodore Royal is one of our most popular awnings. At 300cm deep, it offers ample space for family dining – even for large gatherings and it is the ideal size and easy assembly system for use touring or permanent pitching.

This model has a foil-covered mosquito net in the right-hand side window and adjustable zipped ventilation panels in both the front panels. These provide plenty of fresh air in the awning on hot days, yet keep the insects out. The Commodore Royal can be supplied either with either of our super strong frames Zinox steel or the lightweight CarbonX fibre frame, particularly recommended for touring.

Plenty of doors and ventilation options create a comfortable and spacious dining area in the Commodore Royal.

A. For more space two annex options are available (for more details, see page 32).

• Depth: 300 cm

• A-measurement (from-to): 850-1225 cm

• Canvas material: Fibre-dyed Isacryl

• Frame: CarbonX fibreglass or Zinox steel poles

*Please see page 41 for recommended optional extras and additional technical information.*

# opus 300

- CONTEMPORARY: Modern Design, with mesh door wings
- LARGE: 300cm Deep, with easy assembly frame
- MULTI-USE: For sitting or touring, CarbonX fibre or Steel frame.
- AIRY: Ventilation panels at the front and in both sides.
- DURABLE: Strong, Colour fast, Breathable 295 g/m<sup>2</sup> ISACRYL

## A CONSERVATORY FOR YOUR CARAVAN

Opus 300 – a 300 cm deep awning that is the ideal choice for caravanners who want a larger awning which is equally suitable for permanent pitching and touring. The Opus concept is a fusion between the classic Isabella design and contemporary shapes and materials.

The Opus has large mesh door wings at the front corners, for exceptional wind resistance, protecting the inside against draughts when the front doors are open.

For good air circulation, it has ventilation nets in both sides, these can be left open in most weather conditions as the foil covers shield the vents also there is an adjustable integrated ventilation panel in the front.

Stunning design with practical features, Opus 300 - a mobile garden room.

A. Ventilation with foil-covered mosquito net in both sides lets the air in, easy to see out of – hard to see in!

NEW

- RELIABLE: Quality Flagship model since 1982
- PRACTICAL: 250cm Deep
- LIGHT & AIRY: Large windows, ventilation panels, veranda pole included
- MULTI-USE: For siting or touring, CarbonX fibre or Steel frame  
Use with panels or without as Sun canopy

## THE ISABELLA AMBASSADOR - OFTEN COPIED NEVER BEATEN

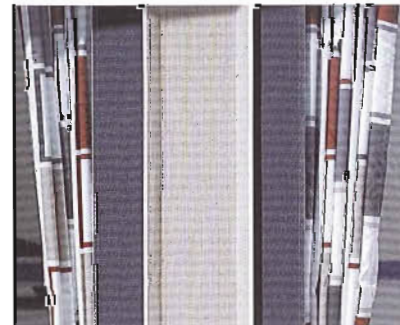

With the 250 cm deep Ambassador models, caravanners are ready to meet any challenge. Whether you like to pitch your caravan permanently or use it for touring – quality and functional design are yours in this flagship model. All panels are removable on these five piece awnings for easy assembly and so that the roof alone can be used as a sun canopy. You can choose either of our easy to assemble strong frames, Zinox steel or lightweight CarbonX fibreglass.

The NEW Ambassador Moonlight, a new style, colour scheme, material and curtains fulfilling the desires of caravanners today. Large window panels will let in the light. Mosquito windows in both side panels will let in the air. (Vented windows have zipped foil covering to keep out bad weather when needed). Six practical doorways, extra wide on front panels, will let in the people!

The classic Ambassador a 295 g/m<sup>2</sup> ISACRYL awning woven in Tweed and Sky Blue comes with adjustable ventilation panels in both front panels and a foil covered mosquito net in the right hand side panel.

AMBASSADOR

The new Ambassador Moonlight designed for today with home from home style and colours.

A. Ventilation net windows ensure the ideal indoor climate while keeping on-noying insects at bay.

# capri lux

- COLOURFUL: Three choices in the most popular sizes
- SIMPLE: 250cm Deep, easy to assemble CarbonX fibre or Steel frame
- FRESH: ventilation panel in right hand side, veranda pole included
- MULTI-USE: Use with panels or without as Sun canopy

Capri Lux is a natural choice – it's especially suitable for touring, and built to withstand the wet conditions often experienced in spring and autumn.

With Four door openings and a long front canopy everyday comfort is assured. The canvas is a fibre-dyed acrylic that is strong, breathable and colour fast. The benefits of the Capri Lux have been enjoyed by many, this model has been established on the market for over ten years, and it has been continuously improved to the level we see here.

Capri Lux is a good choice for the up-and-coming, quality-conscious caravanner.

- Depth: 250 cm
- A-measurement (from-to): Blue; 675-1090 cm, Burgundy; 850-1075 cm, Green; 900-1075 cm
- Canvas material: Fibre-dyed acryl
- Frame: CarbonX fibreglass or Zinox steel poles

*Please see page 41 for recommended optional extras and additional technical information.*

# mistral

- STRAIGHTFORWARD: 250cm Deep, CarbonX fibre or Steel frame
- PRIVATE: Zipped covers for all windows, for sitting or touring
- AIRY: Ventilation panels in both sides
- PRACTICAL: Easy to clean, easy to assemble, six door openings

- Depth: 250 cm
- A-measurement (from-to): 850-1175 cm
- Canvas material: Heavy-duty coated TenCate polyester material
- Frame: CarbonX fibreglass or Zinox steel poles

*Please see page 41 for recommended optional extras and additional technical information.*

The Mistral is a maintenance-friendly, heavy-duty coated TenCate polyester awning. The external coating makes washing down the awning an easy task, while the inside has a special surface which considerably reduces the condensation.

All the windows can be concealed by zipping the roll up/down polyester covers in place.

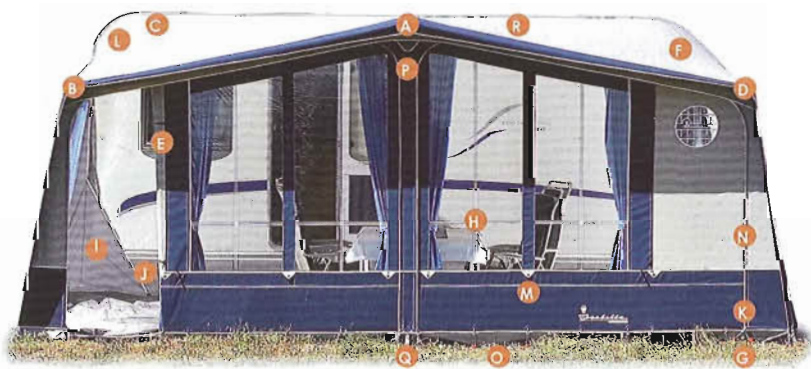

The Mistral has a large foil-covered mosquito net in both sides to increase ventilation and create the ideal indoor atmosphere.

NEW

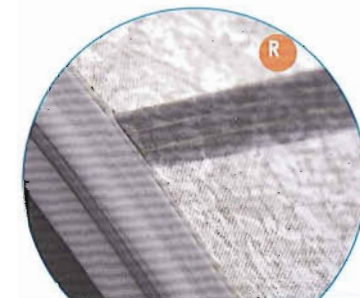

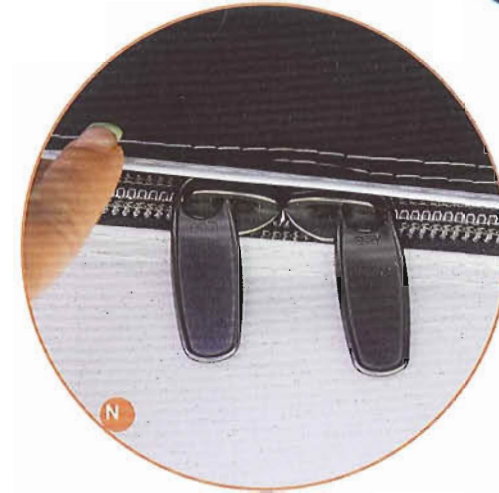

# details

- A. Exclusive Typhoon™ storm sash supplied as standard with many of Isabella's awnings.
- B. DropStop™ rain grommets are fitted to all rivets in the roof.
- C. FixOn II™ screwless brackets designed for better tensioning - with easy positioning - are supplied with all Isabella awnings, porches and sun canopies.
- D. Heavy-duty hard-wearing reinforcements (double thickness in some places) reduce wear and tear.
- E. Door ties with press studs for all Isabella awnings.
- F. NEW! All CarbonX fibre frames are supplied with IsaFix™ clamps. With IsaFix in place securing the frame position has never been easier. With a one touch & one handed lever to operate - a discreet "click" in the knock proof clamp tells you that the IsaFix is locked.
- G. IsaFlex™ pegging elastics with great elasticity and strength are supplied with all Isabella awnings, porches and sun canopies.
- H. The welded-on lattice on the inside of the windows provides strength and is easy to clean.
- I. The double wing, with separate beading and seam detail, ensures our awnings will fit all caravan shapes.
- J. Exclusive storage and transport bags for awnings, along with frame bags and peg bags, are supplied as standard. All Isabella awnings are also supplied with curtains, draught skirt and standard wheel arch cover with press studs as well as comprehensive instructions and detailed frame assembly drawings.
- K. All D-rings are sewn with internal PVC reinforcement to resist the tension of the pegging elastics.
- L. The curve of the roof is designed and sewn to ensure the best possible fit, a minimum of folds and better tensioning of the awning.
- M. Storm Securing PVC triangles are firmly sewn under windows for optimum position of IsaLink™ to protect the awning in harsh conditions.
- N. Substantial four way zips, always run smoothly. Hard wearing and always covered to protect from sun and rain.
- O. Internal mud flap prevents drafts in the awning. Laying carpet over the mud flap makes an effective draft excluder. It also produces the correct tension in the pegging elastics.
- P. All Isabella awnings have ventilation panels; some are fitted with extra panels and/or mosquito net(s) in the side, these reduce condensation and create the best indoor climate.
- Q. Regulator tabs in the corners and spiked shoes on the poles ensure uniform tensioning and reduce wear and tear "locking" the canvas and frame together.
- R. The double-folded seams in the roof are sewn using our specialist sewing machines to guarantee a 100% straight & waterproof seam for a better shape roof.

Almost all Isabella awning models have a channel beneath the harlequin trim where accessories may be connected.

# magnum moonlight

- EASY: improved CarbonX frame system
- VERSATILE: five piece porch - fits most caravans
- ELEGANT: superb colour scheme in 295g/m<sup>2</sup> ISACRYL
- FUNCTIONAL: unbeatable seal to the caravan side
- ROOMY: Great size and an annex can be added too!

## FIRST CLASS PART AWNING WITH BIG IDEAS

The Magnum model is available with exclusive CarbonX, a lightweight and easy to assemble frame. The Magnum has four door options on the removable front and side panels. Do you need more space – there is a choice of annex styles available for this model – see page 32 for details. The annex will fit to either side and can be enclosed by using the awning side panel at the same time.

- Ground: 340x230 cm
- Use: From early spring to late autumn
- Canvas material: Fibre-dyed Isacryl
- Frame: CarbonX fibreglass

Please see page 42 for recommended optional extras and additional technical information.

# minor moonlight

## A ROOM WITH A VIEW

The Minor model is available with exclusive CarbonX, a lightweight and easy to assemble frame. The Minor has a panoramic front window sewn into a removable front panel. There is door access on both sides, plus a ventilation net window in one side that can be weatherproofed by zipping the foil window cover into place.

- EASY: improved CarbonX frame system
- VERSATILE: fits most caravans
- LIGHT & AIRY: Panoramic front window and side panel ventilation
- FUNCTIONAL: unbeatable seal to the caravan side

- Ground: 260x200 cm
- Use: From early spring to late autumn
- Canvas material: Fibre-dyed acryl
- Frame: CarbonX fibreglass

Please see page 42 for additional technical information.

# all-in-one 420, 360 & 300

ALL-IN-ONE 420

• Ground: 420: 440 x 230 cm, 360: 380 x 230 cm, 300: 320 x 230 cm

• Use: All year round

• Canvas material: Fibre-dyed Isacryl

• Frame: Zinox steel poles

*Please see page 42 for recommended optional extras and additional technical information.*

## YEAR-ROUND AWNINGS IN THREE SIZES

Camping in the spring and autumn is becoming more and more popular. These three models match the requirements of the seasons for strength and stability and extend the camping season for permanent pitch caravanners. Complete with our winter securing set and inner roof if required, they can be used all year round. Both are available as optional extras (see page 26).

The two support poles supplied press the sewn-in foam pads securely against the side of the caravan to eliminate any draughts, and the extra wide external mud flap is yet another bonus for those who enjoy camping all year round.

- SAFE: strong construction and pitched roof for all weather use
- DURABLE: strong colour fast Breathable 295g/m<sup>2</sup> ISACRYL
- COMFORTABLE: unbeatable seal to the caravan side
- PRACTICAL: Removable front panel, four door openings

The external mud flap is a bonus for those who enjoy camping all year round.

## snowboy lux winter awning

- **SAFE:** strong construction and pitched roof for all weather use
- **WIPEABLE:** strong Easy clean polyester/PVC
- **COMFORTABLE:** unbeatable seal to the caravan side
- **PRACTICAL:** door openings on both sides, zipped ventilation

More and more caravanners are discovering the joys of winter camping – and some even prefer it. However, this is demanding in terms of the equipment needed.

Thanks to the heavy-duty materials, a special roof angle to prevent the build-up of snow, an extra wide external mud flap, a strong steel frame, flexible pegging and window foil designed to withstand extreme temperatures, Isabella's Snowboy Lux winter awning will stay the course – whatever the weather.

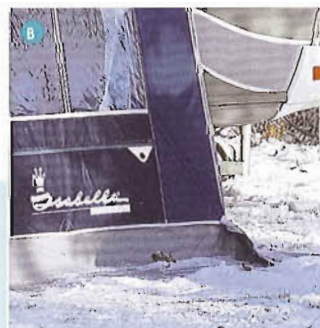

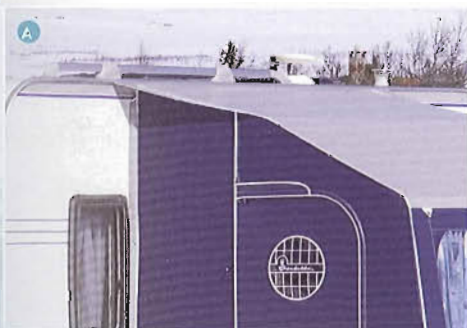

- Ground: 240 x 180 cm
- Use: All year round
- Canvas material: Polyester/PVC
- Frame: Zinox steel poles

Please see page 42 for recommended optional extras and additional technical information.

The special roof angle prevents the build-up of snow. The beautiful but heavy snow slides off the coated roof easily.

The extra wide external mud flap is perfect for camping in the snow. The snow even sits on the mud flap and draft-proofs the awning.

"Caravanning in winter is a brilliant experience, and with the luxury of modern caravans, winter camping is warm and comfortable. Imagine waking up one morning with the temperature at -5°C and radiant sunshine, and your only dilemma is the choice between cross-country and downhill skiing..."

The awning is a room to protect you from the wind, and makes a great place to store your winter sports gear. I can take off my ski suit in the awning, too, so I don't take snow into the caravan."

**TOPIC: WINTER CAMPING**

## sun blue

Enjoy the lazy days of summer with Sun Blue, the ideal sun canopy. Make the most of the sun and on hot days take pleasure in the shade provided.

The straightforward, no fuss frame is available in lightweight CarbonX for minimal effort.

For added protection on breezy days, just zip in the two sides and secure the front poles in the zip pockets.

- Depth: 250 cm
- A-measurement (from-to): 800-1175 cm
- Material: Coated polyester
- Frame: CarbonX fibreglass or Zinox steel poles

Please see page 42 for additional technical information.

# zenith lux

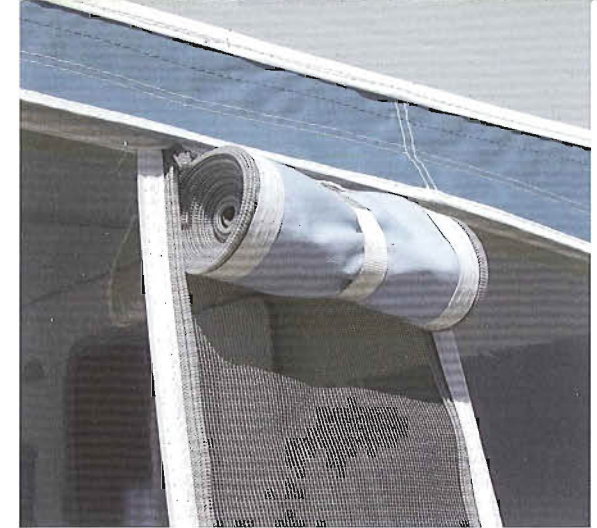

Zenith Lux is Isabella's light-weight sun canopy for touring. Rapidly transforming from a sun canopy into a sun tent using the front and side panels.

The design features superb curved zipped side panels, with super size windows all round for plenty of light and a good view. The canopy provides additional shade, and there are ventilation net panels with zipped covers in the sides to let fresh air circulate.

Zenith transforms into part sun tent awning/part sun canopy using a partition wall (right or left – available as an optional extra).

Matching curtains are available as an optional extra (Firenze design).

**Partition wall and matching curtains (optional extras)**

- Depth: 250 cm
- A-measurement (from-to): 850-1125 cm
- Material: Coated polyester
- Frame: CarbonX fibreglass or Zinox steel poles

*Please see page 42 for additional technical information.*

# shadow

- Depth: 200 cm
- Widths: 500, 400, 360, 300 or 240 cm
- Material: Light coated polyester
- Frame: Heavy-duty CarbonX fibreglass poles (240/300: 2 poles - 360/400/500: 3 poles)
- Optional extras: Net front in matching widths and net side, right or left

*Please see page 42 for additional technical information.*

Sometimes the best ideas are the simplest. The Shadow is made from light coated polyester material. Five sizes are available, they can each be assembled & dismantled in minutes. The smallest sizes can be used as side canopy on most Isabella standard awnings, using an optional extra connection under the side harlequin. For extra shelter and protection from the sun, we introduce a net front and/or side for the Shadow sun canopy. The net has a sun reflective surface on the outside – makes it easy to look out, but difficult to look in. The net is available matching sizes for the different Shadow widths.

NEW

## sun z

The Sun Z touring sun canopy boasts a fresh, stylish look. Amazingly easy to assemble due to its simple design, the Sun Z has strong CarbonX poles that rest against the side of the caravan on non-slip pads. The material is coated polyester and features integral window side panels.

The Sun Z easily assembles without permanent fixing and is available in two widths so is suitable for most caravans.

- Depth: 200 cm
- Widths: 300 cm or 365 cm
- Material: Coated polyester
- Frame: Two heavy-duty CarbonX fibreglass poles

## front sun canopy

The front sun canopy provides fantastic shade in front of your awning. The full frame of roof and leg poles is supplied in Zinox Steel.

Suitable for Isabella standard awnings ('96 models and later) and the Capri ('00 and later). Please state awning model and year when ordering.

- Depth: 225 cm
- Sizes from/to: G12-G21
- Material: Coated polyester
- Frame: Zinox steel poles
- Optional extra: Side (right and/or left)

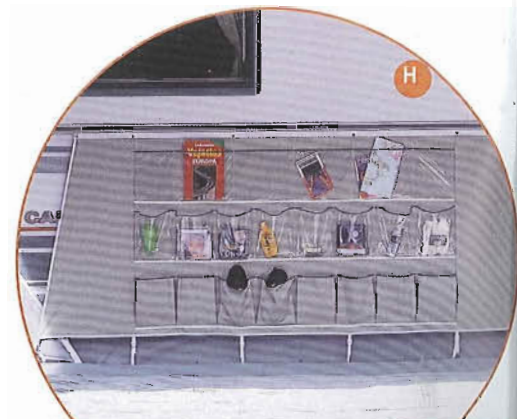

Side (optional extra)

NEW

## optional extras

Isabella has a wide range of optional extras to maximise your caravanning holiday comfort.

- A.** Top Organizer™ is a practical storage net that can be hooked onto extra roof rafter poles (also available as optional extras). The straps are adjustable; it is made of black mesh/polyester with a maximum carrying capacity of 5 kg. Use it to store all the holiday things you want to have at your fingertips, sun lotion, playing cards and magazines.
- B.** Window canopy with sun filter keeps out the sun but provides an unrestricted view. The canopy is available in two widths: 190 cm or 215 cm in smart Charcoal colour. The pole construction is very simple, and with NEW Band-it™ fits almost all caravans with channel above the window. Band-it™ soft grip means the window canopy is quick and easy to fit. Band-it is made from new durable material that does not deteriorate and will not scratch the handles of your caravan. Band-it™ can be retro fitted on older window canopy frames.
- C.** An inner roof minimises condensation and is recommended for caravanning in winter. Fitted using Thermo-Fix fittings and available for all All-in-One and winter awnings.
- D.** A door canopy offers shelter at the entrance and is available in colours to match your awning. See the chart at the back of the brochure for models and availability of door canopies.
- E.** The window canopy in coated polyester and in a width of 190 cm is available in two colour ways: grey with a navy blue or charcoal leading edge. The window canopy's simple pole construction fits most caravans and uses the new Band-it™ soft grip (see description under B).
- F.** With Tall Organizer™, you can keep all those little holiday items controlled. They will always be easy to find here! It is made of coated polyester with individual transparent foil pockets which allow the contents to be seen. Tall Organizer is fitted to the FixOn profile using ThermoFix fittings and its dimensions are W 80 x H 215 cm.
- G.** If you dream of caravanning in winter, we recommend using a winter securing set to protect your awning and frame in heavy snowfall. It consists of two additional rafter poles, FixOn II and three support poles (shown here in blue). Available for all All-in-One part awnings and winter awnings.
- H.** Low Organizer™ is a practical, useful storage space, for magazines, shoes etc. It fits onto the side of the caravan, is made of coated polyester and comes in a choice of sizes.

## customer service

At the Isabella family we know that life with an Isabella involves more than the purchase.

We have appointed retailers throughout the UK to give the best information to our customers. They all have regular fact up dates and can share the news on products and services through seminars and training. Most of our retailers have worked with us for many years and have awning displays and stock our products. If your awning is involved in an accident or you need a size alteration for a new caravan we undertake this work ourselves in Buckinghamshire UK, our experienced staff using authorised material to restore or renew your pride and joy to factory conditions. Many testimonials from happy customers of our repair rooms are just one feature of our website.

Visit the Isabella website: [www.isabella.net](http://www.isabella.net)

Here you will find:

A comprehensive list of caravan A-measurements · Product news · New initiatives · FAQ section · Download of all catalogues since 1957 · Complete information on all models · Download assembly guides for all models since 1990 · Large video archive, including set-up videos · and much, much more besides...

Please specify awning model and year when ordering annexes.

4. PARTITION WALL FOR ANNEX Material: Cotton. Please specify awning model when ordering.

5. INNER TENT Ground: 200 x 130 cm (fits double air mattress) · Material: Cotton with fixed PVC base · Comes with adjustable straps fitted and is also suitable for use in awning.

# windscreens

All windscreens from Isabella are supplied standard with poles (incl. vertical and horizontal poles), guy ropes, pegs and the Stabilo system.

## 1. CRYSTAL 4-SIDED WINDSCREEN

Measurements: 460 x 120 cm · Material: PVC Printed Net material · Colour: Tweed · Standard: CarbonX poles

## 2. SUN 3-SIDED WINDSCREEN

Measurements: 460 x 130 cm · Colour: Grey · Material: Coated polyester · Standard: Zinox poles

## 3. ARMOUR 4-SIDED WINDSCREEN

Measurements: 460 x 120 cm · Materials: Coated polyester/net material · Colour: Charcoal · Standard: CarbonX poles

## 4. ACRYL 3-SIDED WINDSCREEN

Measurements: 460 x 130 cm · Colour: Tweed, · Material: Acryl · Standard: Zinox poles

## 5. FLEX 3-SIDED

Basic measurements: 460 x 140 cm · Colour: Steel Blue/Ice Blue · Material: Coated polyester · Standard: Zinox poles

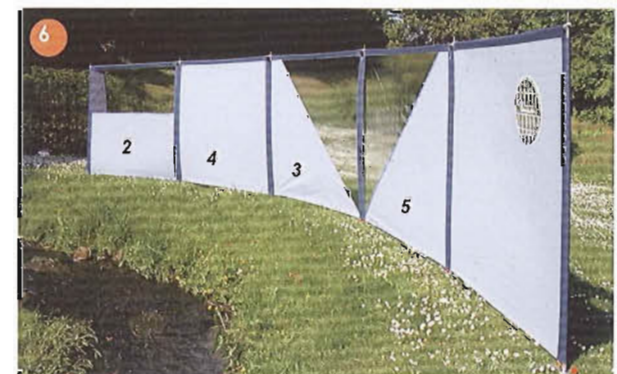

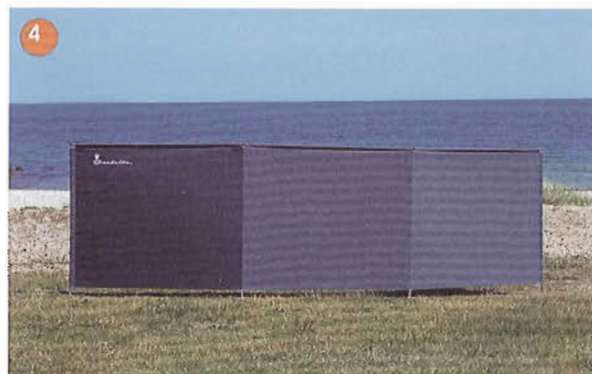

The Stabilo system comprises loose earth spikes and support feet. The system ensures that windscreens remain securely in place at all times. The system is supplied as standard with all Isabella windscreens. The support feet are also available separately for use with awnings.

## 6. ADDITIONAL PANELS FOR FLEX

The basic model may be extended as required by adding more zipped panels to the middle · Panels: As centre panel on basic model (2), with slanting window (3, 5) and plain coated polyester (4) · Panel measurement: 154 x 140 cm · Standard: Zinox poles

# furnishings

Isabella has a large range of furnishings designed to match our awnings. A little bit more style...

1. Lamp shades are available in two versions (pleated and plain), so you can choose the one that suits your own, personal style for your awning. Available in a myriad of colours and designs.

2. Lay a beautiful table with a décor matching tablecloth. These tablecloths, which are coated with a stain and water resistant surface, measure 110 x 160 cm.

3. Exclusive gift box with two cream coloured luxury towels (65 x 135 cm), embroidered with Isabella logo.

4. This soft, warm luxurious Isabella blanket (180 x 130 cm) will keep you warm on a cool evening and is ideal for pic-

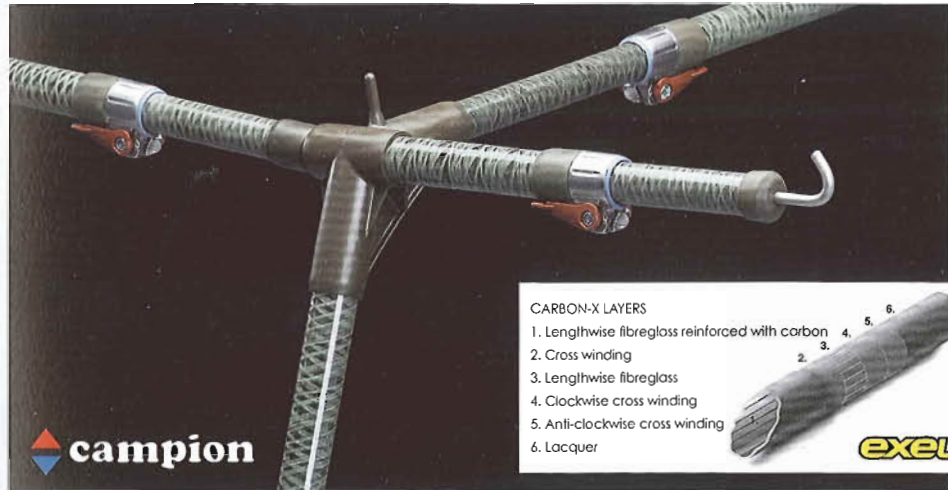

nic. The logo embroidered blanket is fleecy soft on the inside with a suede-effect outer. It is made of a stain resistant microfibre material and has deluxe hemmed edges.

5. For that elegant touch, our exclusive Isabella chair cushions in microfibre are stain and water resistant. Available in luxurious colours: sand, marine or charcoal in two sizes. High back (84 cm), or low back (73 cm).

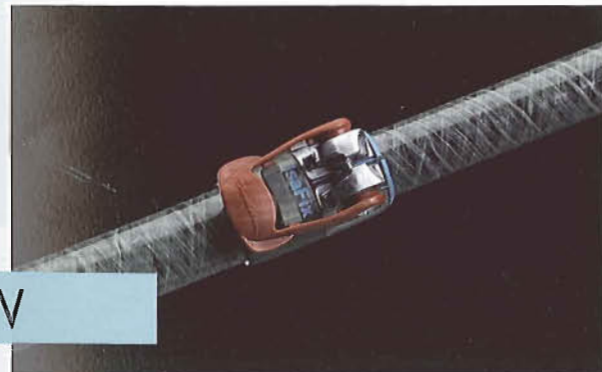

# carbon-x™ fibre frame

The unique CarbonX frame – a carbon-fibre reinforced fibreglass frame, is suitable for both permanent and touring caravanning. Carbon Fibres are combined with glass fibres in varying amounts, according to pole diameters, to offer maximum strength. The frame is light and fully corrosion-resistant. All CarbonX frames are now supplied with the new IsaFix locking mechanism. With IsaFix in place, keeping the frame in position is easy. With one press of the hand grip, a discreet "click" tells you IsaFix is locked in position. Whatever the temperature or the tension, the pressure of the hand grip provides a secure, locked hold.

ISAFIX™ locking clamp included on all 2010 frames. Or update your CarbonX frame! The new IsaFix can be fitted easily to any Isabella frame, replacing telescopic couplings and wing nuts for quick and efficient assembly of the awning frame.

NEW

# zinox™ steel frame

The Zinox steel frame is hot galvanised both inside and out to extend its life and to meet all load bearing requirements. The steel frame is made of ISO-certified high-strength steel manufactured using a Chrome-VI-free process. The strength of the Zinox steel frame makes it particularly suitable for pitching your caravan permanently – and it is included with all All-in-One and winter part awnings, because caravanning in the off-peak seasons demands great structural stability due to weather conditions such as strong winds and snow.

FIXON II™ – screwless brackets. Included with all Isabella awnings and sun canopies. Designed for better positioning of roof poles on any model of caravan, these will ensure superior tensioning and reduce wear.

HERCULES TWINT™ – the ultimate aid for tensioning. Easy to use & adjustable for all types of poles (incl CarbonX and Fibreglass) 22–26 mm. Patented. Optional extra.

# carpets for awnings & sun canopies

In collaboration with Bolon, we have designed a range of carpets that will match your Isabella awning perfectly. "Bohuslän Plus" is a unique extra strong weave in our most popular design. "Isabella-Line" is a carpet exclusively made for Isabella with a modern metallic sheen. "Halland" is a strong breathable carpet with an open structure for high performance on grass and the "Skåne" collection is revolutionary news when it comes to eco-friendly material, called "Bolon@ Green Vinyl". It will appeal to all caravanners who make active environmental choices.

These quality carpets are produced in a soft, woven combination of nylon thread wrapped with PVC and heat sealed. They may be shaped to suit any awning, and can be cut without fraying; they are lightweight and can be easily folded and cleaned. Bolon an Eco awarded factory is committed to providing lead free carpets in a choice of quality to suit your camping needs.

## SKÅNE · NEW! ECO-FRIENDLY

## BOHUSLÄN PLUS

## HALLAND (incl. bag) open weave carpet

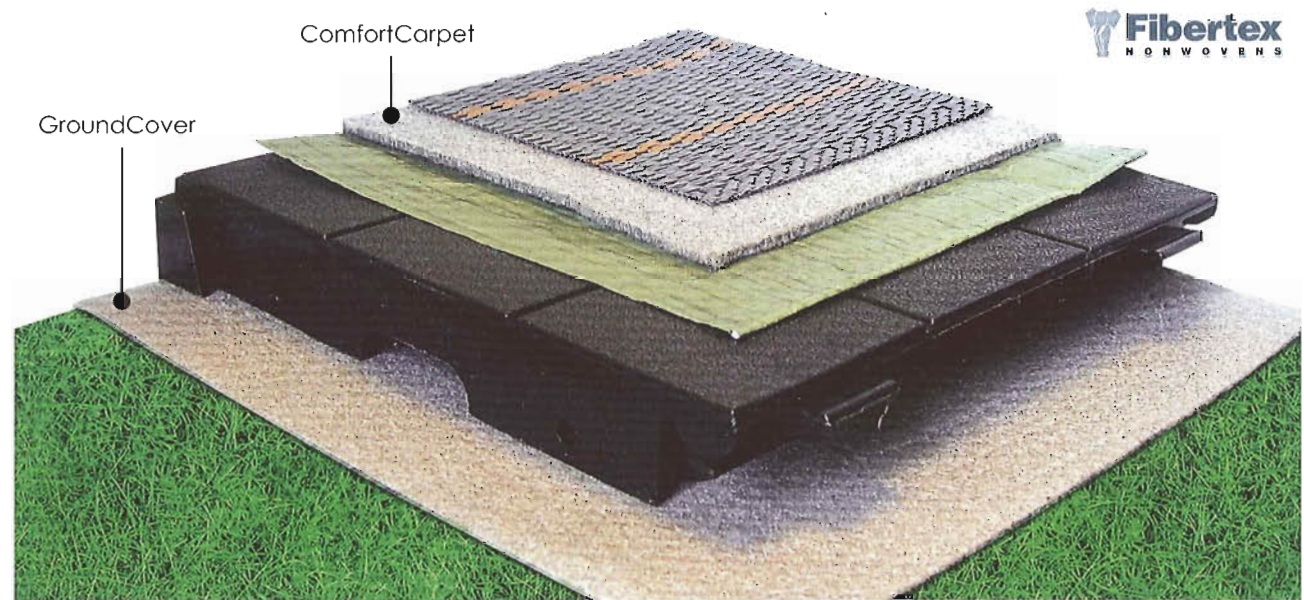

# groundcover™ & comfortcarpet™

GroundCover and ComfortCarpet – designed to enhance your comfort and enjoyment.

GroundCover is the perfect breathable underlay – a thin but strong sheet that lies on the ground, it protects the awning canvas from soil and mud, and because the mudflaps are not in contact with the ground they are easier to clean. Supplied on rolls of 2 x 18 m (36 m<sup>2</sup>).

ComfortCarpet is a soft, insulating comfort underlay which is placed between the plastic barrier or wooden floor and the awning floor covering to keep cold and damp at bay. It also provides a soft floor area to sit and walk on. Supplied on rolls of 1.5 x 15 m (22.5 m<sup>2</sup>).

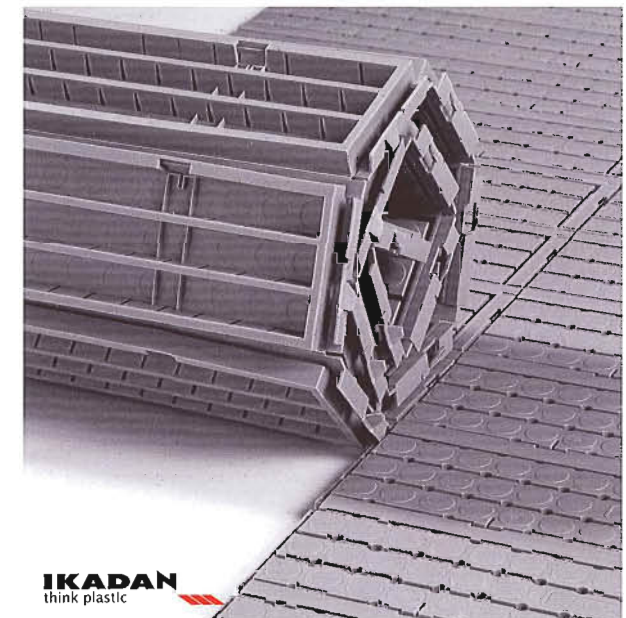

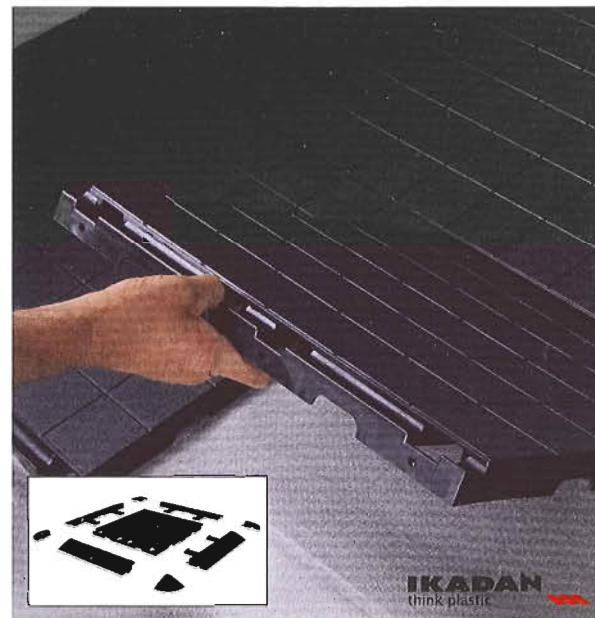

# isabellafloor™ & isabella rollfloor™

If you spend a lot of time in your awning, you want good insulation, and a floor that is smooth and level.

IsabellaFloor offers a full range of advantages. It is easy to install without the use of tools, the 50 x 50 cm tiles simply snap together like building blocks, no other parts are needed. It is easy to store and exceptionally durable.

Isabella RollFloor consists of small tiles of 40 x 10 cm, which are clicked together to cover your flooring area. When the floor is assembled it is easy to roll and unfold again whenever you need it. The perfect floor for touring caravanners.

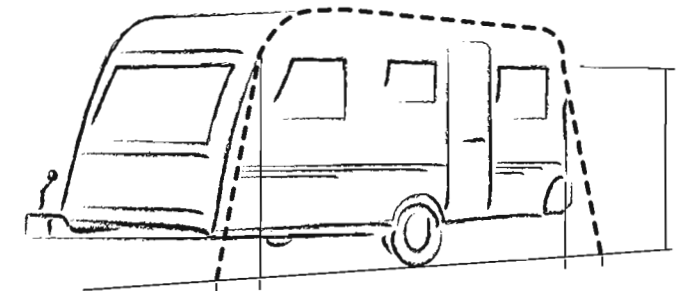

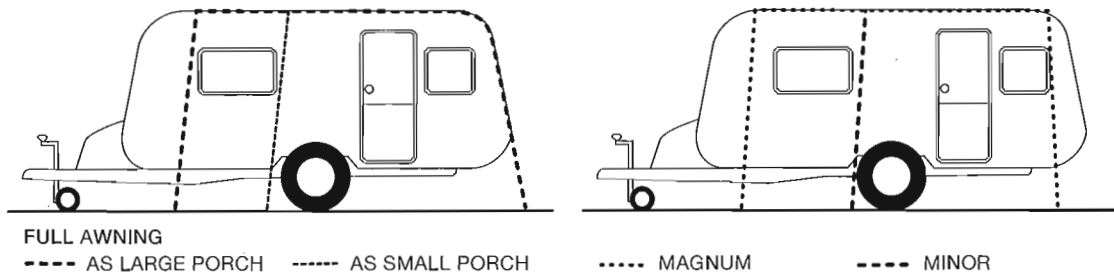

# getting the correct size awning for your caravan

To find out the correct awning size, you will need to know the "A-measurement". How to determine the "A-measurement" (the from-to measurement): Park the caravan on level ground. The "A-measurement" is the length from ground level, through the awning channel and back down to the ground. This can be done easily with a piece of string (see diagram below). We have a database of caravan sizes from 1970 onwards on our website, [www.isabella.net](http://www.isabella.net), you will need to know the caravan year of manufacture and model details. For Porch/Part awnings the caravan channel height determines the fit.

All Isabella full awnings can also be used as part awnings. Fitted in the caravan channel at the door end & sealed against the side of the caravan with a foam pad, support pole and two click profiles at the other end gives superb results as shown in the photograph. Measure your caravan "Full awning as large/small Porch" as shown and match to the nearest Isabella "A" size. This solution works for new and older models the parts are all supplied as optional extras.

# focus on materials

The constant search for the most suitable materials and textile innovations, especially the desire to challenge conventions and routine thinking, has often led to the development of revolutionary concepts for awnings. We dare to try what no one else has tried before and so we are able to create awnings that stand out from the crowd. Through experimentation and inspiration

we created our "Arabian nights" display model. The extraordinary materials and details, and collaboration with leading suppliers resulted in an awning, the creation of which we could tell 1,001 tales about, if only we had enough pages...

**A.** Many Isabella awnings with front and sides made from acrylic use our very own fibre-dyed, textured-weave, durable fabric – which we call **Isacryl**. Isacryl has the highest achievable fade-resistance thanks to the pigmentation method. The density of the weave plus the impregnation all the way through prevents water ingress. Nevertheless, Isacryl is a breathable material, which makes the best possible indoor climate in the awning.

**B.** In the two new Concept models, the front and sides use a strong, coated polyester material with an attractive textured pattern. This material has been developed exclusively for and by Isabella in conjunction with one of Europe's leading textile manufacturers – we call it **IsaTex**. The benefits of IsaTex include its extreme durability and, perhaps best of all, the material can simply be wiped clean.

**C.** Many Isabella awning roofs are made of strong, coated polyester, with an added top coat to help prevent the build-up of dirt. The roof fabric is impregnated and stitched with double-folded seams to guarantee it will withstand even heavy rainfall. The inside is patterned to create a pleasant indoor environment, but this also helps make any marks or fallen leaves etc less noticeable.

Our Arabian nights display model sported a silver roof, brocade-weave acrylic, heart-shaped zip pulls, a lacquered base and tasselled curtain ties.
