Kampa Classic Caravan Awnings

Carnival with optional annexe

Classic is a name we use to describe our range of awnings using traditional materials and familiar designs. The Kampa awnings have been developed to be solid and dependable whilst providing stylish designs and colours that you would wish to attach to your caravan.

They have a high specification that is normally associated with more expensive awnings and every aspect of the awnings have been designed to ensure satisfaction.

Kampa Classic awnings have the following features:

- One piece roof – ensures maximum weatherproofing.
- Attractive light interior print on roof – a dark print makes the awning dark and claustrophobic, especially on a rainy day.
- Strong durable wall material in either polyester or acrylic.
- Crystal clear windows – for a great view out.
- Curtains on easy running track.
- Adjustable pegging bands – makes your awning look great, even on uneven ground. Unlike some awnings, our pegging bands can remain attached to the awning when taken down, saving time and frustration next time you set up your awning.
- Washable base panel – because it's likely to get splashed.
- Ventilation panels – for warm days.
- Zip out panels – make it lighter to set up and can provide extra ventilation or a veranda effect.
- Adjustable gusset panels – to ensure a good fit whatever the shape of your caravan (Arc and Carnival).
- Steel frame with Easy Lock adjusting clamps – one handed operation makes it easy to set up. Lightweight aluminium frame available as an option.
- Kampa Bracket pads – no need for permanent attachment to the caravan. Supplied as standard – unlike some competitors.
- Strong Kampa zips with covers to keep out wind and rain.
- Reinforced stress and pegging points – because they're built to last.
- Interior mud flaps – because they're better inside!
- Supplied with a full length draught skirt and wheel arch cover as standard.
- Storm strap fixing points – ready to take the optional storm straps.

Kampa™

Kampa Lightweight Caravan Awnings

The creators of the Kampa range of lightweight awnings were responsible for the very first lightweight awnings in the UK and for many of the designs available in the market today. Now we bring you the very latest innovations and introduce new models to ensure that Kampa awnings stay ahead of the pack. Our best selling lightweight awnings have been further developed to ensure that they offer the best in design, materials and function and ensure that they remain the finest lightweight awning available. A range of porch awnings that you would be proud to attach to your caravan and that provide first class accommodation on site, yet remain amongst the easiest of awnings to set up and dismantle.

Our awnings all feature sewn in sealing bumper pads to create a seal between awning and caravan; this can be further improved by using the optional rear pole sets. The awnings are made from attractive heavy duty materials - we invite you to 'feel the difference'. All awnings come complete with a draught strip, fully adjustable pegging points, pegs, instructions and a large compression bag that you can easily pack the awning back into!

Our very latest Rally Pro awnings take lightweight awning design to the next level and offer the very best for the discerning caravanner who demands the finest available. Look out for the Rally Pro in the following pages.

Specification for all lightweight caravan awnings

Flysheet:	Rally/Fiesta - 150D Weathershield® heavy duty flame retardant and UV stabilised Rally Pro - Double coated 300D Weathershield® Oxford polyester

Mudflap:	150D polyester interior mud flaps – lie your carpet on top - with pegging eyelets
Seal to caravan:	Sealing bumper pads
Draught skirt:	PVC – included to keep the draughts out from under the caravan

Our Rally 200, 260 and 390 are registered designs and are exclusive to Kampa UK Limited

Rally 260 pro

ARC

Our flagship awning, the Arc encompasses all that's best in awning design and features. The elegant swooping roofline compliments today's modern caravan designs and ensures that the Arc stands out from the crowd. The one piece roof has our own interior printed design - a nice light print that doesn't make the awning feel dark and claustrophobic. The walls are manufactured in a long-lasting and durable Acrylic Taslon fabric with a luxurious exterior texture and you'll get a great view out through the crystal clear windows.

There's ample room inside the Arc due to the generous 250 cm depth and plenty of doors for easy access and, of course, all four panels can be removed or the top half dropped down to create a veranda effect - the Arc even comes complete with a veranda bar. There's also plenty of ventilation available through the large mesh panels in the side windows and the vent in the apex. The Arc is simple to set up and benefits from our easy to adjust Easy Lock adjusting clamps, Kampa bracket pads and the large gusset triangles that help ensure a good fit on your caravan - particularly the front. Options for your Arc include a steel or lightweight aluminium frame, a tall annexe extension and Storm Straps that attach to the fixing points already fitted to the awning.

KampaTM

Optional Extras

- Lightweight aluminium frame with Easy Lock adjusting system
- Tall annexe – fits either side; side panel can be zipped back in with annexe fitted
- Annexe inner tent (145 x 205 cm - maximum height 160 cm)
- Storm straps – clip into buckles pre-attached to awning
- Easy Tread breathable carpet

CARNIVAL

The Carnival is an exceptional awning offering truly remarkable value. The canvas is made from strong, durable 300D Oxford polyester that is lighter weight than old fashioned awning materials, making it easier to handle and set up. The roof is made from a single piece of material, with no seams, to maximise weatherproofing and has an attractive dappled printed interior surface. A strong washable base panel will keep your awning looking smart and the attractive colour scheme will complement any caravan. A strong galvanised steel frame with Easy Lock adjusting clamps comes as standard with a lightweight, but strong, aluminium frame available as an option.

There is no permanent attachment to the caravan; the roof rafters are supported by easy to use bracket pads that attach to beading on the awning and simply rest against the caravan. These bracket pads are supplied as standard. The Carnival is a five piece awning, each of the side panels and both the front panels can be zipped out, again aiding set up. A tall annexe is available that can be zipped into either side of the awning and then the side panel can be zipped back into place to hide the contents of the annexe – another thoughtful feature. The Carnival is very generously sized with a full 250 cm depth, more than enough for the largest family. The Carnival has large panoramic windows and the windows in the side panels also feature full size mosquito mesh panels for excellent ventilation. Obtaining a good fit on your caravan is made easier by the large gusset triangles, built into the rear of the awning, that allow the awning to maintain the correct profile instead of that of the caravan.

GALA 260

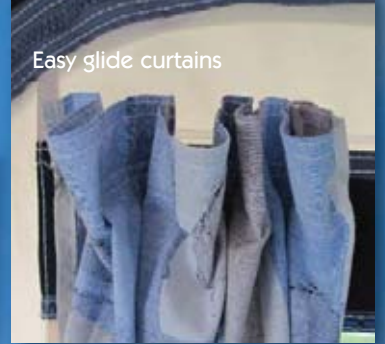

A stylish value for money porch awning that offers a high specification at a realistic price. Importantly, the Gala is quick to set up with a simple to erect frame which is fully adjustable using the Easy Lock adjusting clamps. A steel frame comes as standard but for the weight conscious, an aluminium option is available.

Two large side doors make it easy to get in or out and the whole front panel can be zipped out or dropped down to create a veranda style effect – great for keeping children and pets safely inside. There's a great view out, due to the plentiful windows which have matching curtains on easy slide curtain track.

- Tall annexe inner tent (145 x 205 cm - maximum height 160 cm)
- Storm straps – clip into buckles pre-attached to awning
- Easy Tread breathable carpet

Jamboree 390 with optional Storm Tie Down kit

For those who need more space, the Jamboree 390 makes perfect sense as it can be used as a touring porch or for longer holidays. The Jamboree can also be fitted with an optional annexe making it ideal for friends and family when you've outgrown the caravan. The annexe can be fitted either side of the porch or you can even fit two! As an added bonus the side wall can be refitted after the annexe is attached.

The Jamboree is easy to set up and once set up provides loads of space. The front and side panels can be removed to create a large sun canopy or each panel can be lowered to create a veranda type effect. Mesh panels on both side windows and an apex vent provide plenty of ventilation.

Key Features

Width:	390 cm
Depth:	230 cm
Fits caravans:	235 to 250cm high

- Canopy pole set

RALLY SERIES - INTRODUCTION

Our Rally awnings have taken lightweight awnings to the next level and our latest versions are even better. Unlike other similar awnings, the Rally has adjustable legs that can be adjusted to ensure a perfect fit against the caravan in almost all circumstances. A better fit means a better erected awning and a better erected awning will stand up to more adverse weather and will keep out draughts.

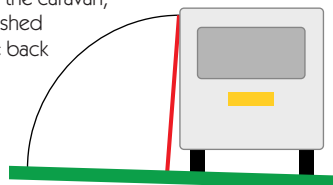

Key Features

- Hybrid steel & Dynaflex frame (Rally)
- Steel frame (Rally Pro)
- Quick and easy set up – no long pole sleeves
- More upright front wall – more useable space inside
- Very stable compared to awnings with only flexible poles
- Adjustable front legs with new adjusting system
- Adjustable pegging points
- Sealing bumper pads against caravan
- Two side doors with secondary mesh doors
- Roll up front panel
- Large crystal clear windows with internal blinds
- Mud flap with eyelets – to keep out draughts
- Draught skirt included

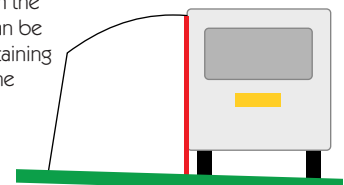

Adjustable legs with Easy Lock clamps.

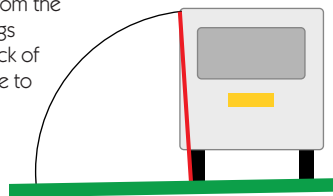

When the ground slopes upwards away from the caravan, the front legs are pushed upwards pulling the back of the awning away from the caravan.

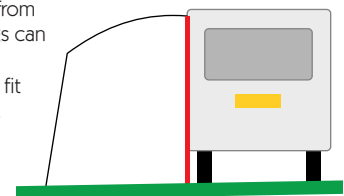

When the ground slopes upwards away from the caravan, the legs can be made shorter maintaining a close fit against the caravan.

When the ground slopes downwards away from the caravan, the front legs drop making the back of the awning too close to the caravan.

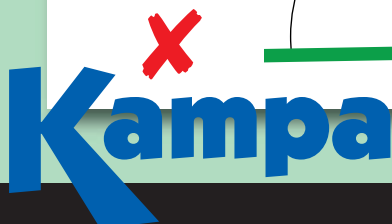

When the ground slopes downwards away from the caravan, the legs can be made longer maintaining a close fit against the caravan.

Awnings without adjustable legs

The advantages of adjustable legs on the Rally

RALLY 200

The Rally 200 brings all the benefits of the larger Rally awnings but in a more compact package. Those caravanners looking for an awning for weekend or touring use will find the Rally 200 quick and easy to set up but don't be fooled by its dimensions. It has a depth of 250 cm and most of that space is usable, due to the angle of the front wall, making it still large enough for a small table and a couple of chairs whilst still allowing easy access to the caravan through the side doors. As with its larger siblings, the Rally 200 has a hybrid steel and Dynaflex frame that makes it very easy to set up and maximises the use of the interior space and the adjustable front legs, with our latest adjusting clamp, ensure the awning fits snugly against the caravan.

Both the side doors have a secondary mesh door, allowing plenty of ventilation without letting bugs in or perhaps letting pets or children out. The Rally 200 is available in three attractive colours so you're bound to find one that will enhance your caravan. It's possible to attach our new integrated windbreak and the Rally 200 also comes ready to accept a Storm Tie Down kit, Monsoon pole, rear upright pole set and a two berth inner tent – all available as optional extras. The Rally 200 – would you want any other compact awning on your caravan?

Rally 200 Wine Red

RALLY 260

Rally 260 Pale Gold with Storm Tie Down kit

RALLY 260

The Rally 260 can fulfil the needs of the weekend or touring caravanner but could equally suffice for longer holidays as it is quick and easy to set up yet has a really spacious interior, especially as so much of that space is useable. The Rally range extends 250 cm from the caravan, providing so much more room than other lightweight awning. Setting up couldn't be easier with only short sections of pole needing to be threaded through sleeves and the steel legs only needing to be clipped into place.

Once erected, the Rally 260 is exceptionally stable and comes with plenty of adjustable pegging points, a full set of pre-attached guy lines and can be fitted with an optional Storm Tie Down kit. The latest version also comes ready equipped to accept our optional Monsoon poles, integrated windbreak, rear upright poles, a two berth inner tent (can be hung left or right) and we can also offer a made to measure breathable carpet. Both front panels can be rolled up and we supply canopy poles to allow one of the panels to be set up as a sun canopy. Like our other Rally awnings, the 260 comes with our adjustable leg system that, together with the rear bumper pads, creates a good seal between caravan and awning.

Specification

Width:	260cm
Depth:	250cm
Fits caravans:	235 to 250cm high
Weight:	17.7kg
Pack size:	80 x 28 x 28cm

Available in three colours to suit modern caravans:

- Lagoon Blue
- Pale Gold
- Chocolate

Rally 260 Chocolate

Kampa™

RALLY 390

Our Rally awnings have taken lightweight awning design to a new level and the latest models bring exciting new features to make your experience easier and more comfortable. Rally awnings have more headroom, are sturdier, easier to set up and look better than any other awning of their type. The Rally 390 is 250 cm deep and 390 cm wide, perfect for the larger caravan and in many instances an ideal replacement for the traditional caravan awning where ease of set up, weight and storage are taken into consideration. Exceptionally light and easy to set up, the Rally has a hybrid frame of high strength steel and Dynaflex, an exceptionally strong flexible pole. The profile of the Rally is more upright than other awnings of its type giving more front headroom and making more use of the available floor space. Each of the front panels can be rolled up and there is a door, with mosquito mesh, in each side panel. The Rally comes with sewn in sealing bumpers to create a seal between awning and caravan and rear pole sets are available as an option to create an even better seal. The Rally 390 is also supplied ready to accept our optional Monsoon poles, integrated windbreak, Storm Tie Down kit and two berth inner tent (can be hung left or right).

RALLY 260 PRO

Rally 260 Pro with optional Tie Down kit

Rally Pro Range

If you thought our standard Rally awning was class leading, then we've something new for you. For the discerning caravanner who demands the finest lightweight awnings available we have combined the superlative features of our Classic and lightweight awnings to produce a hybrid that gives you the best of both worlds. The awning is produced in extra high quality 300D Weathershield® material and to maximise the weatherproofing we hot-air tape the seams. The Rally Pro remains exceptionally easy to set up using steel poles throughout for extra strength and retains the unique adjustable front legs to ensure a perfect pitch every time.

RALLY 260 PRO

The Rally 260 Pro provides excellent accommodation for short or long stays; it shares all the benefits of the standard Rally but comes in even tougher materials. Like other Rally awnings the Rally 260 Pro is quick to set up and once pitched is extremely stable due to its steel frame. It will always look great on your caravan, with classic but modern colours. The adjustable front legs ensure a great fit on all types of ground. Both front panels can be rolled up and there is a door on either side allowing easy access – both of these doors have a secondary mesh panel that can be used to keep the bugs at bay. Crystal clear panoramic windows provide a great view out and the interior blinds will provide privacy when needed. The Rally 260 Pro will accept all the available Rally accessories, including our Storm Tie Down straps, Monsoon poles and integrated windbreak.

Mesh screens in both side doors

Kampa™

RALLY 390 PRO

The Rally 390 Pro is an ideal awning for touring use as it's very fast and easy to erect, but its generous proportions also makes it ideal for longer holidays as well. The set up time is the same our standard Rally 390 – quick! Inside you'll find loads of space due to the 250 cm depth and upright profile of the front wall that allows use of most of the floor area – the headroom at the front is also higher than other awnings. The elegant colour scheme will compliment any caravan and make you the envy of the site.

Specification

Width:	390cm
Depth:	250cm
Fits caravans:	235 to 250cm high
Weight:	27.5 kg
Pack size:	85 x 33 x 33 cm

Available in:

- Charcoal/Ivory

FIESTA 270

Fiesta Range

The Fiesta combines features from traditional awnings but with a modern twist and uses up to the minute materials. The Fiesta is extremely easy to set up as the canvas is extremely lightweight yet once erected, it is extremely sturdy with its strong steel frame. Available in two sizes to suit most caravans.

FIESTA 270

A lightweight awning with the unique option to be able to attach a two berth annexe. The Fiesta comes as standard with two zip out side panels that allow the optional annexe to be fitted either side. The Fiesta is lightweight and easy to set up with a strong steel frame and three rafter poles with bracket pads that do not need to be permanently attached to the caravan and comes complete with our sealing bumpers. The awning has zip out front panels with extra ventilation in the apex, as well as large ventilation panels above each side window. The Fiesta features our unique Daylight Panel in the roof that allows natural light into the awning.

Specification

Width:	270cm
Depth:	250cm
Fits caravans	235 to 250cm high
Weight:	17.5kg
Pack size:	100 x 24 x 23cm (all weights and sizes without annexe)

Available in three colours to suit modern caravans:

- Lagoon Blue
- Wine Red
- Cactus Green

Kampa

FIESTA 350

A larger version of our Fiesta 270, the Fiesta 350 is an ideal replacement for a traditional full caravan awning but with the benefits of light weight and easy set up. Like its smaller sibling, you can zip an annexe into either side of the Fiesta 350, great for an extended family, guests or your holiday clutter. This optional annexe comes complete with a two berth inner tent with sewn in groundsheet.

Setting up couldn't be simpler and when erected the structure is exceptionally sturdy. There's plenty of options, with both the front and side panels zipping out – you can even drop the side panels down to let in fresh air whilst at the same time keeping young children or your pets safe inside. The Fiesta 350 comes with the usual Kampa specification including rear bumper pads, 'Feel the difference' fabric and fully adjustable pegging points.

Specification

Width:	350cm
Depth:	250cm
Fits caravans:	235 to 250cm high
Weight:	24.4kg
Pack size:	102 x 31 x 29cm

(all weights and sizes without annexe)

Available in three colours to suit modern caravans:

- Lagoon Blue
- Wine Red

MOTOR RALLY RANGE

Ever since we introduced the Rally caravan awning, motorhome owners have been asking us for a version to fit their motorhomes. Well now we've introduced the Motor Rally – available in two versions – 260 and 390 and in two heights, to suit different height motorhomes. The Motor Rally is designed for static camping and provides all the advantages our Rally awnings to motorhome owners. The Motor Rally comes complete with two diameters of beading, suitable for traditional awning rail or to slide into the extrusion on the front of a roll out awning.

Optional Extras

- Rear upright pole set
- Storm Tie Down kit
- Monsoon pole – extra support for the roof
- Waterproof PE groundsheet
- Easy Tread breathable carpet
- Two berth inner tent
- Integrated windbreak
- Canopy pole set

Key Features

- Hybrid steel & Dynaflex frame
- Quick and easy set up – no long pole sleeves
- Upright front wall – more useable space inside
- Very stable compared to awnings with only flexible poles
- Adjustable front legs with new adjusting system
- Adjustable pegging points
- Sealing bumper pads against motor home
- Two side doors with secondary mesh doors
- Roll up front panel
- Large crystal clear windows with internal blinds
- Mud flap with eyelets – to keep out draughts
- Colour: Pale Gold

MOTOR RALLY 260 L & XL

Specification

- Width: 260cm
- Depth: 250cm

Available in two heights:

Motor Rally 260 L – designed to fit coach built motorhomes with a rail height of between 250 – 270 cm high.

Motor Rally 260 XL – designed to fit coach built motorhomes with a rail height of between 270 – 290 cm high.

Large enough for longer holidays but quick enough to set up just for an overnight stay, the Motor Rally is ideal for the motorhome owner looking for extra outside living space. It shares all the benefits of our Rally 260 but is designed to fit motorhomes.

Model	Weight kg	Pack size L x W x H cm

Motor Rally 390 XL	19.4	82 x 31 x 31

Awning optional extras

Rally Storm Tie Down Kit

All 2010 and onward model Rally awnings come ready fitted with attachments to accept our Storm Tie Down Kit. If you're expecting particularly windy weather, these tie downs will assist the guy lines already fitted to your awning. Importantly, they pull on the frame and not the canvas. Supplied in pairs complete with large pegs.

Carnival Storm Tie Down Kit

All Classic awnings come ready fitted with attachments to accept our Storm Tie Down Kit. Simply clip one end into the buckle on the awning and peg the other end with the peg supplied.

Rally Monsoon Pole

Designed to fit the 2010 and onwards Rally range, the Monsoon pole adds extra tensioning for the roof panels; particularly useful in wet weather. Supplied in singles, the Rally 200 requires 1, the 260 requires 2 and the 300 requires 3 poles.

Easy Tread Carpet – all models

An attractive deluxe awning carpet that gives a warm luxury feel to any awning. The close weave does not allow insects or worms to come through but breathes to keep grass alive. Available to fit all Kampa awnings and in universal sizes.

Rally Integrated Windbreak

The perfect solution to extra privacy and protection for the front of your awning. One end of the windbreak actually clips to the front pole of the Rally awning, following the contour. This gives a much better fit than other windbreaks and the smart grey colour matches all Rally awnings. Why not have two?

Awning Carpet – all models

A great accessory that provides a warm comfortable surface underfoot. Just lay on top of your normal groundsheet or carpet. The top surface is a soft, durable flannel that has a foam middle layer and a waterproof backing.

Two Berth Inner Tent – all Rally models

A two berth inner tent can be suspended in the Rally awnings. Complete with a sewn in groundsheet. The Rally 260 and 390 inner tents can be fitted to the left hand or right hand side. The 200 inner tent fits in the front part of the awning.

Easy lock – all models

Multi-purpose flooring tiles that lock together for use inside and out. Strong closed cell EVA gives a warm, cushioned, non slip surface whilst the holes allow the grass to grow. Links together like a jigsaw to provide any shape. Ideal for high traffic areas.

Rear Upright Poles – Rally & Fiesta models

All our lightweight awnings come complete with sewn-in bumper pads that create a seal between the awning and caravan. This seal can, if required, be enhanced with the addition of the Rear Upright Pole Set. This creates an even better seal.
