

RAPIDO

2013

Your next stage in the art of travelling

Serie 6/6FF

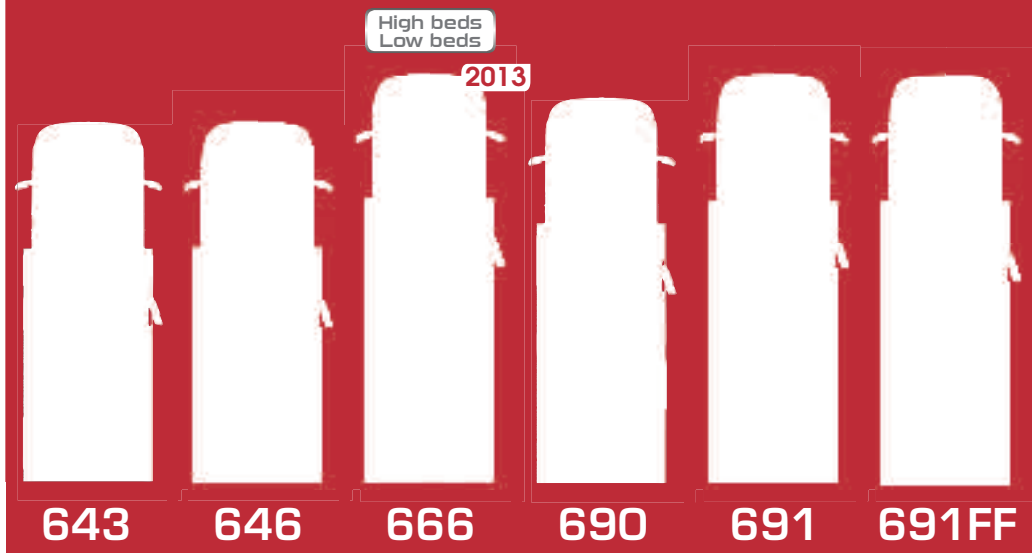

CHARACTERISTICS AND CARRIERS BY MODEL

Low-profile models with special chassis, extra-wide rear track and drop down ceiling bed in option B

REMEMBER

When purchasing a RAPIDO, the unladen weight includes the weight of the vehicle's standard equipment. The unladen weight of camping-cars is determined in compliance with the laws currently in force and includes the vehicle in working order, the driver (75kg), the gas bottle, fresh water (depending on model: 50 l) and fuel tanks up to 90 % of their capacity with a tolerance of +/- 5 % (in accordance with European Directive EC 92/21).

It is therefore the responsibility of the user to adjust the load and the number of passengers on board according to the permissible GVW, the payload and the weight of any additional equipment he installed or has had installed in the vehicle.

Any accessories installed optionally or by the distributor are not included in the definition of the vehicle's unladen weight. The weight of these elements must therefore be deducted from the vehicle's payload.

Serie 7FF

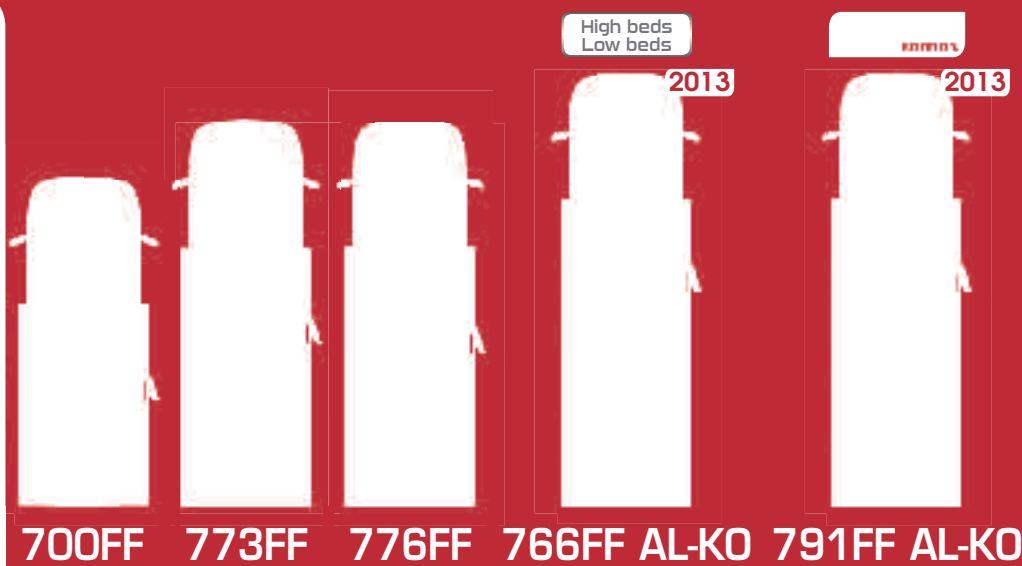

CHARACTERISTICS AND CARRIERS BY MODEL

Low-profile models with special chassis, extra-wide rear track and drop down bed

REMEMBER

When purchasing a RAPIDO, the unladen weight includes the weight of the vehicle's standard equipment. The unladen weight of camping-cars is determined in compliance with the laws currently in force and includes the vehicle in working order, the driver (75kg), the gas bottle, fresh water (depending on model: 50 l) and fuel tanks up to 90 % of their capacity with a tolerance of +/- 5 % (in accordance with European Directive EC 92/21).

It is therefore the responsibility of the user to adjust the load and the number of passengers on board according to the permissible GVW, the payload and the weight of any additional equipment he installed or has had installed in the vehicle.

Any accessories installed optionally or by the distributor are not included in the definition of the vehicle's unladen weight. The weight of these elements must therefore be deducted from the vehicle's payload.

Serie 8F/8M

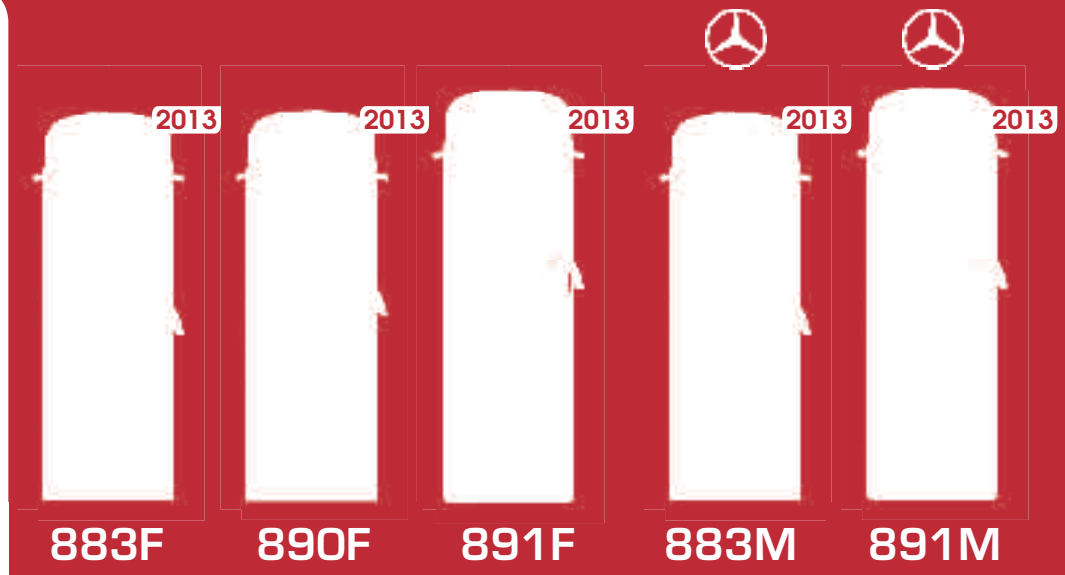

CHARACTERISTICS AND CARRIERS BY MODEL

Mercedes or Fiat A-Class models

REMEMBER

When purchasing a RAPIDO, the unladen weight includes the weight of the vehicle's standard equipment. The unladen weight of camping-cars is determined in compliance with the laws currently in force and includes the vehicle in working order, the driver (75kg), the gas bottle, fresh water (depending on model: 50 l) and fuel tanks up to 90 % of their capacity with a tolerance of +/- 5 % (in accordance with European Directive EC 92/21).

It is therefore the responsibility of the user to adjust the load and the number of passengers on board according to the permissible GVW, the payload and the weight of any additional equipment he installed or has had installed in the vehicle.

Any accessories installed optionally or by the distributor are not included in the definition of the vehicle's unladen weight. The weight of these elements must therefore be deducted from the vehicle's payload.

Serie 90dF-FH

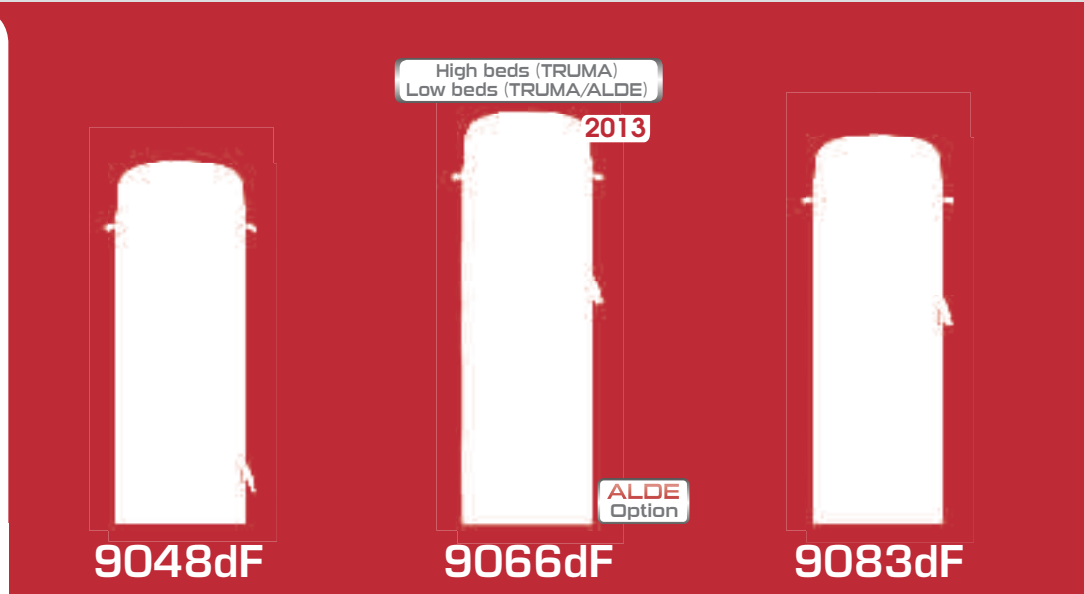

CHARACTERISTICS AND CARRIERS BY MODEL

Fiat AL-KO A-Class double floor models with extra-wide rear track and independent wheel suspension

REMEMBER

When purchasing a RAPIDO, the unladen weight includes the weight of the vehicle's standard equipment. The unladen weight of camping-cars is determined in compliance with the laws currently in force and includes the vehicle in working order, the driver (75kg), the gas bottle, fresh water (depending on model: 50 l) and fuel tanks up to 90 % of their capacity with a tolerance of +/- 5 % (in accordance with European Directive EC 92/21).

It is therefore the responsibility of the user to adjust the load and the number of passengers on board according to the permissible GVW, the payload and the weight of any additional equipment he installed or has had installed in the vehicle.

○ = Option, ● = Original, - = Not available, PACK = UK PACK (RHD)

Any accessories installed optionally or by the distributor are not included in the definition of the vehicle's unladen weight. The weight of these elements must therefore be deducted from the vehicle's payload.

Serie 10

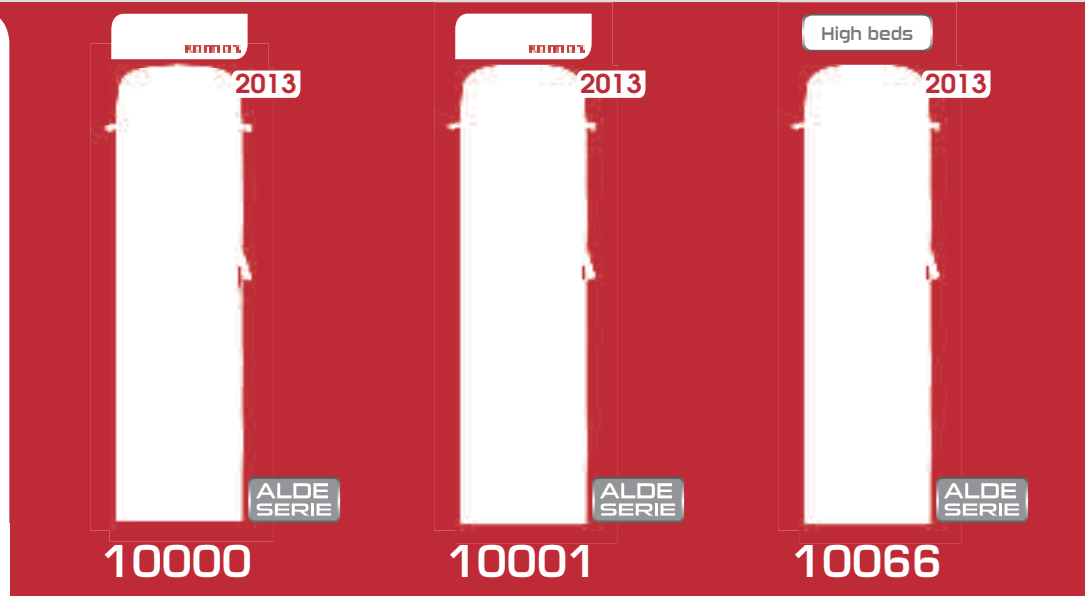

CHARACTERISTICS AND CARRIERS BY MODEL

Fiat AL-KO A-Class models with tag axle (GVW = 5T and GCW 6T) with ALDE as standard and independent wheel suspension

REMEMBER

When purchasing a RAPIDO, the unladen weight includes the weight of the vehicle's standard equipment. The unladen weight of camping-cars is determined in compliance with the laws currently in force and includes the vehicle in working order, the driver (75kg), the gas bottle, fresh water (depending on model: 50 l) and fuel tanks up to 90 % of their capacity with a tolerance of +/- 5 % (in accordance with European Directive EC 92/21).

It is therefore the responsibility of the user to adjust the load and the number of passengers on board according to the permissible GVW, the payload and the weight of any additional equipment he installed or has had installed in the vehicle.

Any accessories installed optionally or by the distributor are not included in the definition of the vehicle's unladen weight. The weight of these elements must therefore be deducted from the vehicle's payload.

Serie 9M-MH

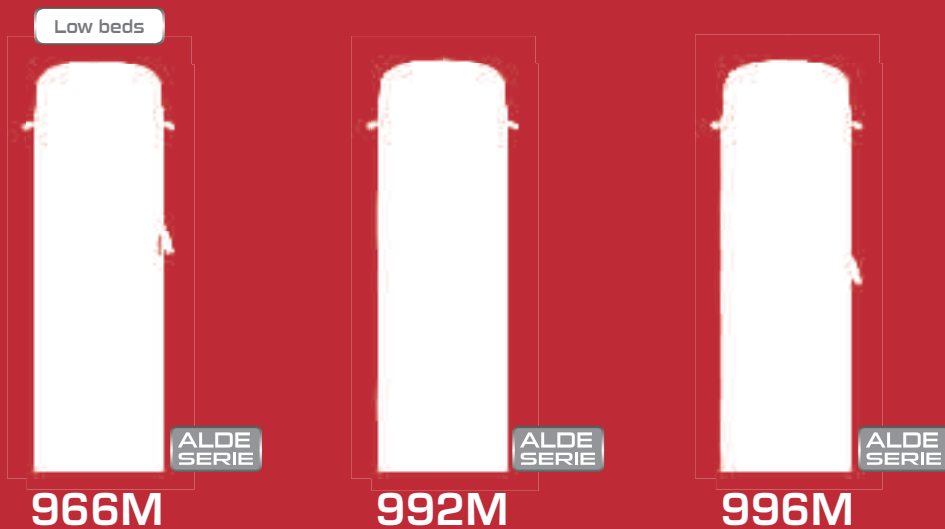

CHARACTERISTICS AND CARRIERS BY MODEL

Mercedes A-class Heavy models with ALDE as standard

REMEMBER

When purchasing a RAPIDO, the unladen weight includes the weight of the vehicle's standard equipment. The unladen weight of camping-cars is determined in compliance with the laws currently in force and includes the vehicle in working order, the driver (75kg), the gas bottle, fresh water (depending on model: 50 l) and fuel tanks up to 90 % of their capacity with a tolerance of +/- 5 % (in accordance with European Directive EC 92/21).

It is therefore the responsibility of the user to adjust the load and the number of passengers on board according to the permissible GVW, the payload and the weight of any additional equipment he installed or has had installed in the vehicle.
