A state of mind

As the creator of streamlined and innovative designs, Chausson has the reputation of a trailblazer and holds the key to inventiveness.

From historical models like the Acapulco to the brand-new 611, a low profile with a revolutionary layout, innovation is what drives us forward.

With Chausson, you'll discover how to create your own horizon...

TECHNICAL CHARACTERISTICS

www.facebook.com/chausson.campingcar

HERTZ, the world's leading rental company has chosen Chausson... Solid proof of our reliability!

Chausson has chosen LOISIRS FINANCE, a financial partner specializing in financing recreational vehicles. Find out about its services and offers, and calculate financing on its internet site www.loisirs-finance.com (for the French market only)

To better understand
who manufactures
your motorhome,
close your eyes and imagine...

- a **french factory** covering the equivalent of 33 football fields (or 200,000 m², 37,000 m² of which are roofed),
- an **annual production of over 10,000 motorhome** and camper units,
- **more than 800 people** to design and produce them,
- motorhomes that are **sold in over 27 countries**,
- **35 years of existence in 2015**, or the production equivalent of 50,000 Chausson motorhomes.

our manufacturing site

Tournon-sur-Rhône - France

CHAUSSON

Standard* extras

Long-lasting protection

- An **IRP structure**
A major innovation for improved insulation, better resistance and greater protection. See page 8.
- A **seven-year warranty**... Who can top that?
Water tightness is a key feature of your motorhome; at Chausson it's guaranteed for seven years (with an annual check-up by a certified network member). The extent of this warranty goes well beyond the standards of the profession. It's the best pledge of peace of mind that Chausson can give you.
- **165 dealers to keep watch** on your motorhome
Our network of dealers is made up exclusively of true recreational vehicle specialists who know Chausson backwards and forwards. Chausson offers one of the market's most extensive and best-equipped European networks.

A vision of quality

- **Legendary SEITZ windows**, the best choice
They're synonymous with outstanding practicality, excellent quality, easy handling and top safety because they can't be removed from the outside.
- **Panoramic cabin roof** that can be opened for a breath of freedom
It's great for ventilation and even better for light... At Chausson, well-being is also important.

Optimal storage, depending on the model

- A full-width **hold**
Two, and even three, standard doors to make loading easier and more optimal. For us, it's obvious.
- A lowered **hold**
Your back will appreciate this handy storage solution that's easy on your muscles!
- **Reinforced chassis extensions** in galvanized steel
The sturdiness of our motorhomes is no accident; it's the result of choosing strong materials. For chassis extension, we use galvanized steel reinforcement that's more robust and long-lasting.
- **Lighting for the hold**
Whatever the version line, all our garage holds are illuminated and 12 V/220 V socket.

Easy accessibility

- **Easier access** is not a minor detail; it's essential!
There's no need to unfold a step plate, it's built in (except on the 620), for a more stylish and handy access.
- Just **one key** for the entire unit
You won't need a fistful of keys!
At Chausson: just one key for the unit (main door and garage doors), just one key for the carrier.

Carrier choice

- An **essential element** for high-quality travel
At Chausson, we've chosen reference brands that are able to supply a specifically designed chassis for the motorhome, and we have a specially equipped after-sales network trained in the leisure vehicle market. See page 12.

Heating you can use on the road

- You can use all our heating systems on the road with no constraints. This is ideal for your passengers and very handy for heating the unit before you stop for the night. See page 9.

Comfortable fixtures

- **High-quality bedding**
See page 11.
- **Easy Bed** adjusts to the height you want
Most of our beds over garage holds (except for twin beds) can be height-adjusted over a distance of 30 cm.
- **Clever storage areas**
Most of our beds over a hold can be raised for easier access to the storage areas.

Well-designed ventilation

- **Double ventilation**
It doesn't take much experience with motorhomes to know that ventilation in the bathroom is essential. At Chausson, all our bathrooms have both an opaque window that can be opened and a skylight in the roof.
- **Rigid shower partitions**
Whatever the version, all our motorhomes are equipped with elegant rigid partitions, never with a PVC curtain.

Useful pre-equipment

- **Standard bike carrier adapters**
To avoid any risk of infiltration, bike carrier adapters are installed as standard equipment so that you won't have to drill holes. All you need to do is choose your bike carrier!
- **Pre-wiring for a back-up camera**
To reduce mounting time (and workshop costs), all our motorhomes are pre-cabled for a back-up camera you can order from your dealer.
- **TV pre-equipment**
Whatever the version, all our motorhomes have at least one 220 V/12 V TV-antenna outlet.

Well-designed lighting

- **100% LED lighting on the inside**
100% LED lighting provides ten-fold savings in energy and a product lifecycle that is thirty times longer. A bright choice for you and the planet!
- **Night lighting**
Night lighting is designed for a cozy atmosphere and for your safety with built-in LEDs near the floor.
- **Outside lighting** as a standard feature, whatever the range level.

High-end seating

- The foam in our cushions has been specially designed to offer firm seating comfort (without sagging over time) and high-quality, resilient support for your back.
- For greater passenger comfort, each road seat is equipped with a height-adjustable headrest.

Solutions for greater comfort

- **Drawers won't slam shut**
Whatever the version line, all our drawers have cushioned closing and latches to avoid accidental opening when you're on the road.
- **Adjustable living room table**
For easier circulation and greater comfort in the living room, all our low profiles have a central table** that can be adjusted in height (telescopic pedestal), longitudinally and crosswise.
- **A maxi refrigerator is NEVER an option**
Only some of our compact models (less than 6 m) don't have one, simply because it's not technically possible to install one.
All our refrigerators are triple-mixtriple-mix: they can be used with gas or 12 V or 220 V electricity. At Chausson, energy selection is automatic (AES), whatever the range level, just compare !

* For most of our overcabs, low profiles. For details, see the technical data sheet.

** Except on the 514, 637, 638.

The IRP structure, a major innovation

With IRP, Chausson is true to its goal of high-quality manufacturing. Whether the version is Flash or Welcome, our structures are all made with the same high standard of quality.

IRP is a major innovation that provides better **insulation**, greater **resistance** and improved **protection**.

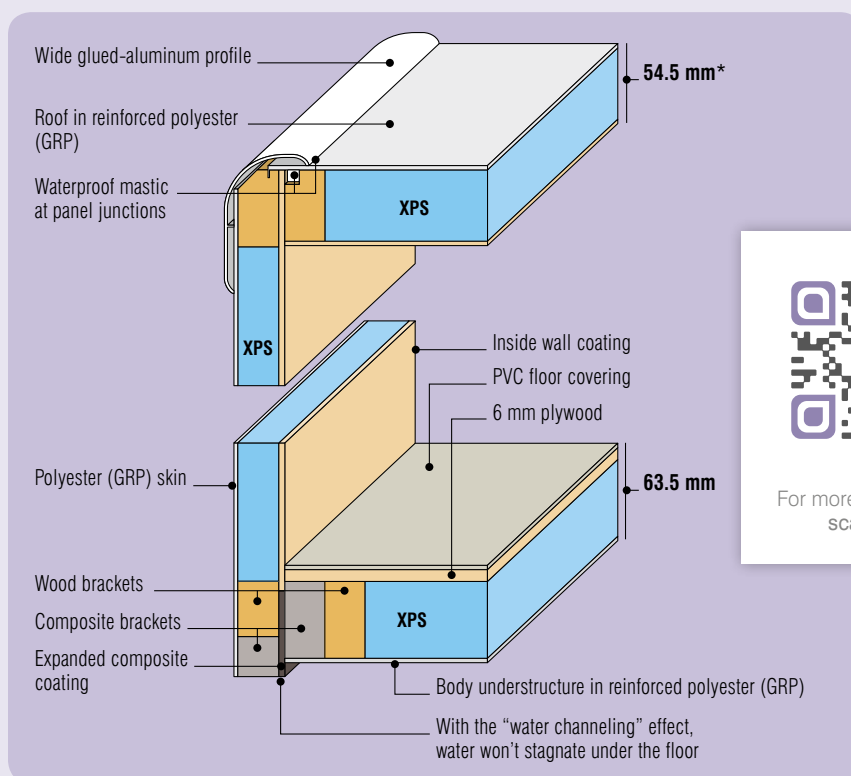

Just have a look at the core of our manufacturing secrets...

Better **insulation** relies on a combination of technologies that ensure well-being  

- **XPS insulation**, an extra-firm foam with high sound and thermal insulating power.
- **Specially designed floor and roof thickness** for insulation that exceeds the usual norms.

For better **resistance**, a reinforced structure  

- Protective **polyester (GRP) skin**, provides greater resistance to scratches, minor impacts, gravel, hydrocarbons, ultraviolet radiation and bad weather in general.
 - Extra-thick **floor and roof**, among the best on the market, offering greater resistance to loads and limiting deformation over time.
 - High-performance **wood and composite** combination, reinforces the structure of our walls and floors by combining composite longevity with the exceptional sturdiness of solid wood.
 - A **water-tight** shield, all materials in contact with the exterior are rot-resistant and insensitive to humidity. On the inside, we prefer high-quality wood.
- * NB: because of its particular shape, the roof of our overcabs uses a specific technology, 34.5 mm thickness, EPS insulation.

For more information
scan me.

No compromises means peace of mind and better **protection**  

- Against **leaks** because of our rot-resistant materials and wide aluminum profiles that are glued on instead of drilled.
- Against **storms** because of the polyester (GRP) covering that limits damage from hail (on the roof and walls) or salt (under the floor).
- Against **heat, cold** and **noise** because of polyester (GRP) and a rarely matched insulation thickness.

Proof of our confidence: a seven-year warranty  

For 35 years, our goal has been to continually improve comfort and durability; we are convinced of the effectiveness of our technical choices and manufacturing processes.

Standing behind our convictions, we offer you a **seven-year warranty on water-tightness**, subject to an annual check-up by a certified member of our network.

The all-in-one technical area

Accessible from a special outside door, the Technibox provides a single place for all the essential controls that ensure proper operation of your motorhome.

The Technibox is sealed with a lockable watertight door that opens on two different technical compartments:

- the **electricity** area gives you access to the electrical panel: no more contortions when you change a fuse!
- The **clean water** area lets you:
 - fill the water reservoir,
 - adjust reservoir capacity according to the number of travelers and/or the load transported,
 - easily clean the reservoir for maximum hygiene.
 This compartment has a tray for collecting spilled water; water won't stagnate in the compartment and drains out through the opening designed for this purpose.

The Technibox is standard on all our overcabs and low profiles except for model 620.

Electrical technical area

Electrical panel
Access to fuses
Charger/battery power
Protective cover

Clean water technical area

Purging valve for the clean water reservoir
Cleaning hatch
Water reservoir filling with a swivel elbow

230 V outside power outlet

Maximum protection for people

Because Chausson doesn't need to be constrained by a standard in order to ensure maximum protection for customers, all our motorhomes have a 30 mA differential circuit breaker as a standard feature.

In contrast to a traditional circuit breaker that protects equipment, the differential circuit breaker also protects people. It will automatically shut off the current if it detects a loss of current corresponding to defective insulation. This device thus allows protecting against short circuits and conductor overheating in case of overload.

Fuel heating

For more economical gas consumption

The choice of gas represents a real user cost, especially in winter or in cold regions where the cylinder must be changed every four or five days on average. In addition to offering comfortable independence, fuel heating saves money with a maximum full-power consumption of 0.5 L/hour.

Forget about refill anxiety

In contrast to gas, which is sometimes difficult to find in another country and may have an incompatible connection, gas oil is available almost everywhere on earth.

Easy to use, no manipulation

Just a glance at the fuel gauge on your dashboard will tell you whether you have enough left. Forget disagreeable surprises and changing cylinders in the middle of the night. With Chausson, you won't have to bother with gas cylinders. Only the refrigerator, the hot plate and sometimes the water heater are connected to a gas supply.

Less loaded weight and additional space

Choosing gas oil heating also means lightening the loaded weight of the motorhome. Two 13 kg gas cylinders really weigh 52 kg (13 kg corresponds to contents only). Not having to bring them along represents a significant reduction in weight. By using just one gas cylinder, you have less weight and more storage space.

Use while on the road with total safety

In contrast to gas, which requires using a protected circuit that closes off the gas supply in case of impact, fuel heating can be used while on the road, permanently and with total safety.

In addition to road comfort for your passengers, you'll appreciate finding a cozy, warm unit when you stop.

Many of our competitors propose this choice in option, while others don't have it at all.

Interior fixtures

An optimized bedroom

- **Standard 160-cm-wide island bed**
See page 11.
- **High-quality bedding**
See page 11.
- **Easy Bed** with adjustable height
Most of our beds over a hold (except for twin beds) can be height-adjusted over a distance of 30 cm.
- **Clever storage areas**
Our rear bedrooms generally have roof closets above the bed(s). Most of our beds over a hold can be raised for easier access to the storage areas.
- **Deep closet(s)**
With automatic lighting when the door opens for the Welcome and Exaltis versions.
- **Reading lamps**
In general, bedding is equipped with individual reading lamps to avoid disturbing others.

A real fully-equipped kitchen

- **A maxi refrigerator AES**
Most models feature a 175 Ltr AES (Automatic Energy Selection) refrigerator with elegantly curved doors and a mirror effect or a 145 Ltr "Slim" refrigerator.
- **Stove top** with glass cover
When the cover is open, it protects the wall from cooking splatters. When closed, it becomes a work surface.
- **Soft-close drawers**
With latches for road travel.
- **Trap door for storage** under the refrigerator
Depending on model.

A practical bathroom

- **Dual ventilation** with **opaque opening window** and **roof skylight**
- **Dual drain shower tray**
Most of our shower cubicles have two stopper openings for optimal water drainage.
- **Soap dish, glass holder and skylight** equipped with a **towel rack**

The driver's seat

- **Comfort and safety** behind the wheel
See pages 12/13.
- **Storage area** over the cab
All our low profiles feature a thermoformed storage space above the cab with LED lighting on each side.
- **Dual USB port**
To recharge cell phones, tablets, etc.

Welcome

High-quality bedding

For a little nap after lunch or a refreshing night's sleep: there's nothing like a good rest before a new hike, a mountain bike circuit or a visit to see the local sites.

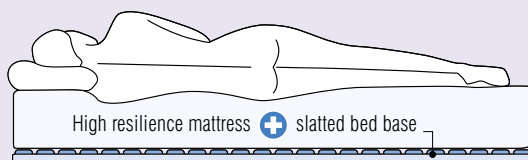

Stretch out and enjoy, you're in a Chausson...

A comfortable mattress with a sturdy slatted base

- All our mattresses are:
 - manufactured in France,
 - specially designed for our motorhomes with high-quality foam.
- All our mattresses are encased in a drill fabric that is:
 - antibacterial and anti-dust mite (for optimal hygiene),
 - certified OEKO-TEX® Standard 100 (free of substances harmful to health).
- On Welcome and Exaltis models, all our mattresses (for the main bedding) have:
 - high-resilience foam that adapts perfectly to the shape of your body for minimum pressure,
 - a thermal-regulating Thermocool covering for better dissipation of body heat,
 - a layer of reinforced wadding for a soft feel and optimal-quality bedding.

Most of our main bedding comes with a sturdy slatted base as a standard feature for greater comfort and ventilation, with a metal frame for better resistance.

Overcab bedding also has special anti-condensation plates and can be raised (to facilitate going back and forth between the unit and the cab), leaving an extra-large 155 cm space!

Island bed width, 1.60 m

- Chausson once again pioneers by offering an exceptional standard width of 160 cm on all island beds, regardless of range level.

An adjustable roof bed

Unless the roof bed is the main bed, all our low profiles (except 611) can hold another optional single or double roof bed, depending on the model.

- During the day, the roof bed slips into the roof to leave room for an exceptional lounge area and in the evening becomes a main bed or a "guest room" for friends.
- All our roof beds are electric but can be raised manually if necessary.

On all models with a maxi lounge, the main roof bed has a lower position that is easy to reach without having to use a ladder

The chassis, an essential element for high-quality travel

At Chausson, we have chosen reference brands that are able to supply a specifically designed chassis for the motorhome, and we have a specially equipped after-sales network trained in the leisure vehicle market.

Ford and Chausson have been partners for over thirty years.
With more than seven million vehicles sold worldwide, the legendary Ford Transit has more than proven its worth.

It's equipped with the latest technology and new functions for safety and comfort.

- ❶ Motorhome chassis with a lowered center of gravity for easier access.
- ❷ The wide rear track optimizes inside space and road stability.
- ❸ - Driver's **airbag**,
 - **braking assistance** (ABS): an anti-lock system that keeps wheels from blocking when brakes are applied intensively,
 - **anti-slipping** (ASR): a system that regulates acceleration to keep the driving wheels from losing traction,
 - **dynamic trajectory control** (ESP): this program optimizes stability on the road and in curves and improves braking,
 - six-speed manual transmission,
 - **hill-start assist function**,
 - disengageable hand brake.
- ❹ Swivel seats in the cab, with double armrests and adjustable height.
- ❺ - Ford Audio System with AM/FM radio, Bluetooth®, USB ports and an auxiliary plug for connecting a Smartphone or hands-free phone or listening to music,
 - leather-encased steering wheel,
- ❻ Central locking of cab doors.
- ❼ Wide side protectors in the body colour.
- ❽ - **16" alloy wheels**,
 - tyre repair kit.

Sweet dreams

x2 Rijeka

See page 11.

Welcome

Bathrooms

Most of our shower stalls have **two stopper openings** for optimal water drainage.

Towel rack under the skylight.

Dual ventilation with opaque opening window and roof skylight.

The kitchen

175 Ltr **refrigerator** with elegantly curved doors and a mirror effect or a "Slim" refrigerator up to 145 L.

All our stove tops have a glass cover:
- when the cover is open, it protects the wall from cooking splatters,
- when closed, it becomes a work surface.

Welcome

Kitchen with **soft-close drawers** and latches for road travel.

Standard equipment

Choice of chassis (1), an essential element for high-quality travel; see page 12.

IRP structure, a major innovation; see page 8.

Water tightness guaranteed for seven years, with an annual check-up by a certified network member.

Panoramic cab roof that opens and comes with a shade and screening. Thermoformed storage space above the cab with **LED lighting** on each side.

Driver and passenger seats swivel and can be height-adjusted; equipped with covers (Welcome version) that match the living unit fabric.

Dual USB port above the cab for recharging cell phones, tablets, etc.

100% LED lighting inside and outside, for high light yield and recyclable technology.

Access handle for easy entrance to the living area.

SEITZ double-glazed windows with screening and shade.

Central table (2) that can be adjusted in height (telescopic pedestal), longitudinally and crosswise. A fold-down table is also available on certain models.

Seat belts corresponding to the number of regulation seats; at least four belts with three points.

For greater passenger comfort, each road seat is equipped with a **height-adjustable headrest**.

Pre-equipped with a TV stand (Welcome version) and one or more outlets.

Most of our beds **over a hold** (except for twin beds) can be **height-adjusted** over a distance of 30 cm; see page 11.

Standard equipment (cont.)

Most of our **beds over a hold can be raised** for easier access to the storage areas.

The **ventilator/extractor skylight**, Welcome version (1), allows extracting stale air and ventilating the inside very quickly.

Heating that can be used on the road, ideal for your passengers and also very useful for warming the unit before a stop.

Built-in LED lighting at floor level to create a soft atmosphere and ensure that it's easy to move around at night in the living unit.

Luxurious entry closet (Welcome version).

On the Welcome model, the inside of the **closet is lighted automatically** when the door is opened.

Two, and even three, standard doors (1) to make loading easier and more optimal. All our garage holds are heated, whatever the finishing level.

All our models have a **curtain separating the cab and unit** as a standard feature (unless the model has sliding blinds in the cab).

Waste water can be emptied easily and cleanly using the lateral handle!

Backup radar (Welcome version).

LED lighting on the outside.

Optional equipment

In addition to a sliding screen panel, our **deluxe door** includes a window with shade, an inside trash can and two-point safety closing (VIP Welcome Pack).

These **pull-down isothermal shades** are made with a multi-layered material that protects you from daylight, prying eyes and excessive temperatures (Flash version).

Convertible fifth passenger seat for road travel, depending on model.

The **Easy Chef** outside stove/plancha can be used as a three-burner stove or as a plancha for barbecues. Depending on model

Coupling authorized up to two tons, depending on model.

Backup camera built into the rear band with a screen on the rearview mirror.

* Only on C646, C714, 611, 620, 624, 627, 628, 630, 718, 727, 728, 737

- The optional "towing/motorcycle carrier" equipment can in certain cases change the number of passengers on the car registration papers. Your dealer will be able to give you more information.
- weight ready for use: empty weight ready for use includes the driver's weight (75 kg) and the maximum reserve of water in circulation, 90% of fuel and 100% of gas. The empty weights ready for use on the list take into account only standard equipment upon shipment from the factory. European regulations tolerate a difference of +/- 5% on empty weight ready for use. The vehicle maker reserves the right to modify.
- Accessories and equipments fitted as an option are not included when determining the weight. Their weight should therefore be deducted from the available payload.
- You may be able to find certain heavy accessories like large blinds or generators in the marketplace. The weight of these accessories should be deducted from the payload and could possibly lead to a reduction in the actual passenger numbers. It is therefore important not to exceed the maximum loads on axles and the technically acceptable loaded weight when the vehicle is fully loaded.
- Clean water reservoir capacity (approved for our overcabs/low profiles/A class; capacity is 1 L (except 620 30 L), vans 100 L (except 597CS 90 L) must comply with regulations vis up to the user to adapt loads and the number of passengers to the vehicle's loaded weight. To do this, clean water reservoir capacity can be adjusted by the user to avoid reducing the number of passengers.
- Some models photographed in this catalogue may be shown with equipment supplied as an option. The characteristics of photographed models may vary from one country to the next. Despite the care taken in producing this catalogue, this cannot be viewed as a contractual document. Chausson reserves the right to modify its models without prior notice. Chausson cannot be held liable for any modifications made by its suppliers nor typographical errors when printing these documents. It is forbidden to reproduce, even partially, text or document. Do not litter the public highway.
- Your retailer is at your disposal to advise you and provide you with any additional information.
