

# Swift 1993

QUALITY WITH STYLE

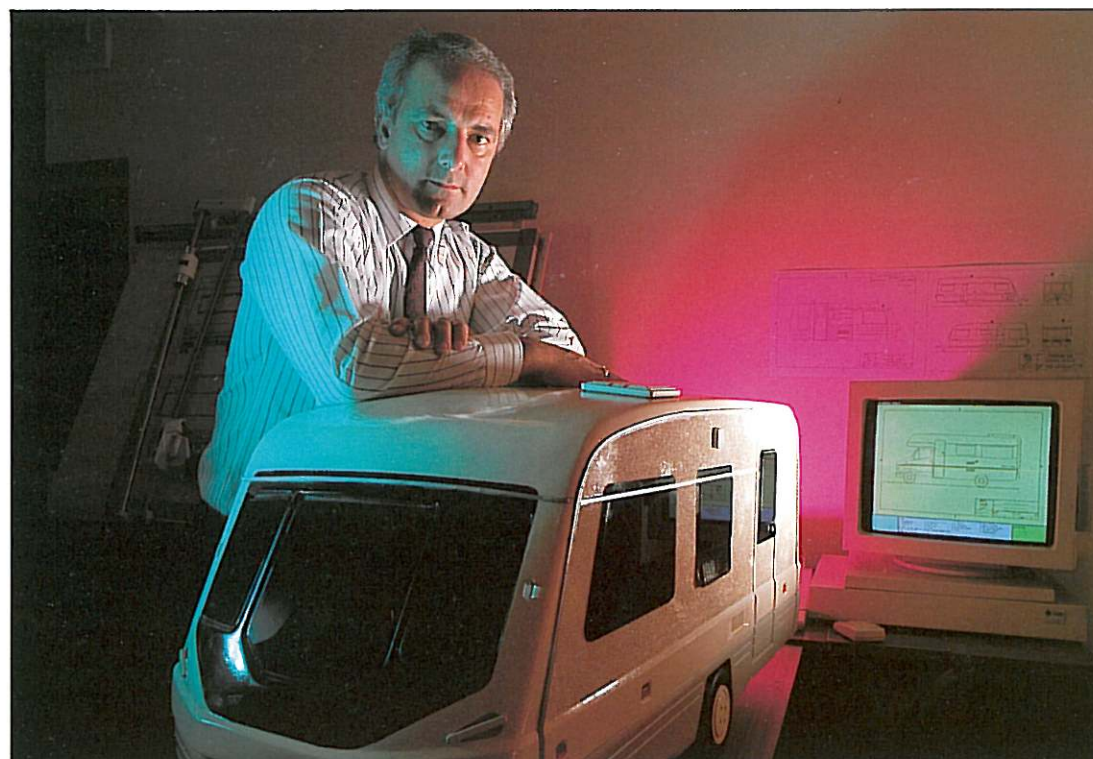

# DESIGNED TO LAST

From the time the very first Swift model was produced 28 years ago, innovative design and quality of construction have been the hallmark of the company.

Today, the Swift Group is one of the leading companies producing leisure vehicles in Europe.

All Swifts are built to stand the test of time and an excellent resale value is testimony to their ongoing popularity over the years.

The 26 acre production complex at Cottingham in North Humberside bristles with all the latest high technology design and

production equipment. The Swift manufacturing process applies the rigorous quality procedures set down in BS5750 Part 1.

This has transformed the way the modern caravan is conceived and manufactured.

Starting at the design stage, a powerful CAD (computer aided design) system produces everything

from initial concepts to final drawings for the production lines. It provides the designers with hundreds of options, many in three dimensions, enabling them to picture the Swift tourers of tomorrow without a panel being built.

Before they go into production, each prototype is put through a series of rigorous 80mph speed tests,

to prove their safety and stability beyond doubt. A stability that has earned Swift countless speed, endurance and rally records over the years.

Some of these tests are unique to Swift, as are many of the new manufacturing processes. Together they help the company to build a better caravan.

# QUALITY BUILT-IN

Years of experience and craftsmanship are built into every new Swift product; experience that has gained the company the reputation for making the best quality touring caravans in Europe.

The best products deserve the best dealers, and Swift's nationwide network are all chosen to ensure the standard of quality built into

each caravan is matched by the standard of service provided by every Swift dealer.

A service that is supported by a factory operated after sales scheme, designed to provide the Swift customer with an after sales service second to none.

Purpose built after sales delivery vehicles provide

dealers with a round the year supply of spare parts.

And with dealer staff attending regular product knowledge and after sales service courses at the company's training centre, every Swift customer can rest assured that they receive the most professional help available.

The 1993 range is the

most comprehensive ever produced by Swift.

31 models from 5 ranges, including new exterior shapes, warmer interiors and several new models, provide every conceivable combination of layout and specification to meet your personal needs, precisely.

From the entry level Rapides to the top of the range twin axle Conquerors, they all have one thing in common. The Swift reputation for unrivalled style and quality.

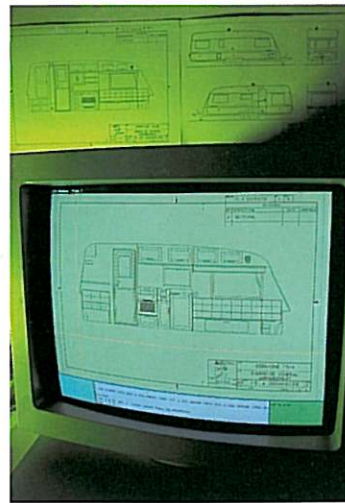

We leave you to choose your own style and your own level of comfort.

Inside every Swift is a story of craftsmanship, attention to detail and years of experience, supporting the company's reputation for building a better touring caravan.

Many of the more important points are hidden from the eye. Floors that are 44mm thick, walls 24mm thick and a roof 31mm thick,

bonded into the laminated walls, providing extremely secure furniture fixings.

Most models are fitted with special ventilation boards behind the seat rests. This feature, together with slatted bed box top construction, eliminates

condensation in these high-risk areas. A lightweight chassis with the latest wide track axle ensures optimum safety and performance.

The Swift production and development procedures have been formulated to meet the exacting standards set down in BS5750 Part 1, and all sections of the business operate using the same centrally generated computerised information.

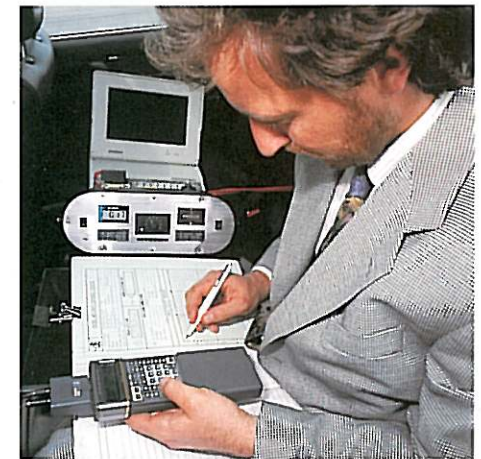

All Swift products meet national safety standards and all our electrical power packs and wiring conform to international standards ISO 8818, making them suitable for use throughout Europe.

## THE INSIDE STORY

provide superior strength and insulation.

Most Swifts feature solid ash framed furniture doors with stylish profiles, for good looks and a long life, all precision-made on the latest computer-controlled machines.

And all furniture is fitted using the unique Swift system of screwing into steel plates

## SAFETY AND STABILITY

Three of the most important things to consider when buying a caravan are safety, stability and security.

When it comes to safety and stability, Swift have a record second to none. Every prototype caravan has to undergo rigorous stability tests carried out at speeds of up to 80mph before they go

into production.

One of the tests includes measuring the nose weight of each prototype while it is actually being towed, using a piece of test equipment that is unique to Swift. Swift is the only manufacturer able to check the aerodynamics and towing stability of their caravans by recording the

nose weight in every possible towing situation.

And when it comes to speed, a standard unstabilised Swift Rapide 380/2 holds the national 24-hour speed record, at an average speed of 97mph over 24 hours, behind a standard Vauxhall Carlton. True testament to the safety and stability of the Swift brand.

The wheels on all Swift models are fitted with the double hump safety feature to reduce the risk of the tyre leaving the wheel rim in the unlikely event of a motorway blowout.

All Swift models have security numbers etched into every window and every number is recorded on a central computer system. The same number is stamped into the 'A' frame of the chassis.

All models (optional shower)

440/450 and 490

The new six-model Rapide range sets unrivalled standards in style and value for money. It brings the renowned Swift quality of construction and standard of finish within the range of anyone looking for a new caravan.

For 1993, the Rapides are extra special. A new exterior shape gives the Rapide the style and appeal of Swift models much further up the market.

Inside, the Rapides have new, better quality furniture with stylish framed doors, and a warmer feel with improved soft furnishings.

And the final choice on the internal specification is all your own. Choose from the impressive normal specification or the luxury 'GXL' factory fitted added value pack.

#### MAIN FEATURES

- Front gas bottle and optional spare wheel storage

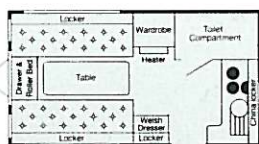

## THE RAPIDE RANGE

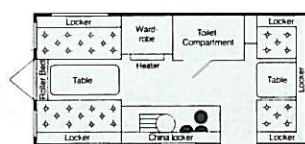

- 20 metre mains electric cable
- Opening front window
- Fully double glazed windows
- Lightweight galvanised steel chassis with wide track axle
- Washroom with vanity unit, deep wash hand basin and shower tray
- Mains electrics with 1 socket
- 12 volt socket
- 60 litre 3 way Electrolux fridge
- 3 burner stainless steel hob and grill unit
- Stainless steel sink unit
- Carver 1.8kw underfloor flued heater
- Free standing table
- Velvet curtains
- Bolt-on wheel trims
- Self-priming submersible water pump
- Roller blind to kitchen window
- Awning light

Optional 'GXL' pack with:

Three opening front windows, Cascade water heater, shower, exterior-access battery box and charger, window in door with blind and cassette toilet.

The Swift Diamond range has increased in both size and standard of specification for 1993.

Four new models, the Minuette, Coronette, Doublette and Pirouette mean there are now eight different models and layouts to meet every taste.

Outside, the Swift Diamond has a completely new exterior shape with a flat one-piece roof and stylish new glass fibre front panel incorporating new window profiles with rounded outer corners.

Inside the specification has been upgraded to include a cassette toilet, three opening front windows, blinds and flyscreens to at least three windows, exterior battery box, and an exterior aerial socket, in addition to the already generous specification.

# THE SWIFT DIAMOND RANGE

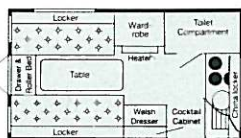

## MAIN FEATURES

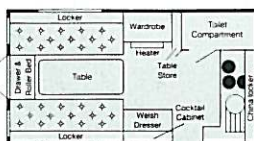

- Mains electrics with 2 sockets
- 20 metre mains electric cable
- 12v socket
- TV aerial socket
- 12v reading lights
- Awning light
- Exterior access battery box (excl. battery)
- 10 amp switch mode charger transformer
- 60 litre 3 way Electrolux fridge
- 3 burner enamelled hob
- Enamelled bowl drainer
- Carver Trumatic 1.8kw underfloor flued heater
- Thetford cassette toilet
- Carver Cascade gas/electric water heater
- Fitted shower
- Blinds and flyscreens to at least 3 windows
- Roof light with night blind and flyscreen (flyscreen only in toilet)
- Exterior door window with blind
- Solid ash framed furniture doors
- New style crockery racks
- Lined velvet curtains

The Challenger 'SE' remains Britain's most popular range of touring caravans, providing a unique blend of modern styling, a wide choice of layouts and a high level of internal comfort.

For 1993, the Swift Challengers have a stylish new exterior, with an eye-catching new graduated burgundy striping with blending burgundy and white mouldings, and glaze panelling.

The choice of layouts increases to nine, with the introduction of a 360 two-berth model, while the 480 has a new layout, still offering a separate toilet and shower.

The interior has been given a new warmer treatment and substantially upgraded specification. A glance at the features shows why Challengers are still leading the pack.

#### MAIN FEATURES

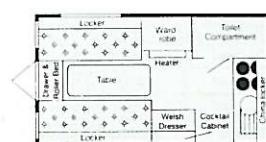

- Mains electrics with 3 sockets
- 20 metre mains electric cable

# THE CORNICHE RANGE

The Corniche in its all-glace colour has a most distinctive shape and is arguably the most attractive caravan available anywhere in Europe.

It provides the perfect answer for the person seeking a unique blend of individuality and uncompromising style and comfort.

The furniture doors have a new deep lacquered finish, while the soft furnishings are made up in a new style to project the pure quality of the Corniche.

The kitchen now has a cooker hood with extractor fan, activated by a domestic style pull out door, and an insulated underslung fresh water tank feeds the kitchen and shower room.

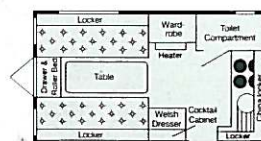

## MAIN FEATURES

- Mains electrics with 3 sockets
- 20 metre mains electric cable
- 12v socket
- Omnimax Gazelle TV antenna with radio aerial
- 240v mains reading lights

# THE CONQUEROR RANGE

For size, style and comfort, the four-model Conqueror range offers the ultimate touring experience.

A new 520 single axle model, featuring one of Europe's most popular layouts, joins the range for 1993. With its spacious side board on the nearside, it provides an ideal living area, leaving the front dinette to act as a second or permanent bedroom as required.

The three twin axle models also get improvements to the furniture, while the new 550 features the unique ergonomically designed kitchen launched in 640 models last year.

The Conquerors, year-round caravanning in the grandest of style.

## MAIN FEATURES
